10-piece stainless steel flush-mounted letterbox system BASIC Plus 382XU UP with bell box on the side | Left | 100mm depth | Stainless steel, brushed | with 10 mailboxes

Product number 382XU-VA-10-SPS-100-L

Product description

10-unit stainless steel flush-mounted letterbox system BASIC Plus 382XU UP with side bell box - brushed stainless steel

Modern flush-mounted letterbox for 10 units - made in Germany by Briefkasten Manufaktur.

The letterbox is made entirely of stainless steel V2A, brushed. The very high-quality workmanship and the well thought-out concept make this flush-mounted letterbox one of our top sellers. A rain drip edge for optimal water protection, a continuous rubber lip for quiet posting, the robust interchangeable nameplate, a practical mail retention bar and the very sturdy lock characterise this flush-mounted letterbox. The flush-mounted frame made of stainless steel V2A is fitted with a foam rubber gasket and guarantees very high durability.

The letterbox systems of the BASIC Plus collection are characterised by the consistent use of stainless steel V2A. The result is very high durability and sustainability. The construction has been developed by our own engineers with a view to high flexibility and modularity, easy spare part assembly and uncomplicated self-installation. Spare parts are directly available for all BASIC Plus systems.

- Universal adapter is suitable for all common built-in speakers (Siedle, Ritto, TCS, Busch-Jäger, Gira, Legrand Bticino, ELCOM, Auerswald, Comelit etc.).
- Preparation (camera not included) for a camera.
- 10x round stainless steel doorbell push buttons Type: Grothe Protact, max. 24 V AC/DC, 1.5 A, IP54 (push-force limitation).
- Interchangeable nameplate (Type 2), changeable from the front.
- Plaster cover frame made of stainless steel angle profile 25 x 58 mm, 240-grit brushed.

Camera or intercom preparation

We always recommend that electrical installation be carried out by a qualified electrician.

We offer preparation for cameras & intercoms from various manufacturers for our letterboxes. The preparation does not include end devices; it consists of providing the screw mounts, drillings & cut-outs so that you can mount your device without difficulty.

Water protection

To achieve optimal water protection for your mail, the letterbox or letterbox system should, if possible, be located under a canopy.

Mail is only protected from water if it is placed completely inside the box and the inlet flap is closed. Mail that is not fully inserted allows moisture and dirt to enter the letterbox. Therefore it is necessary to plan adequately sized letterboxes for the expected requirements. Under certain extreme weather conditions water may still enter (according to DIN EN 13724 up to 1ccm). This is not a cause for complaint.
