13-unit freestanding mailbox Design BASIC 385P-9016 ST-T with bell box - RAL 9016 traffic white | RAL 9016 Traffic White, fine-textured matt | Left | with 13 mailboxes

Product number 385P-9016-13S-SP-L

Product description

Freestanding mailbox system BASIC 385P with bell/intercom unit left for 13 units – RAL 9016 Traffic white – narrow design

The freestanding BASIC 385P mailbox system for 13 units combines 13 separately usable mail compartments with an integrated bell-function box. This brings together mail reception, doorbell buttons and the preparation for a compatible door intercom system in a robust, visually closed entrance solution for large residential complexes, multi-occupancy properties and commercially used buildings. In this variant, the bell/intercom unit is located to the left of the mailbox system.

The mailboxes are made from galvanised steel and are powder-coated in RAL 9016 Traffic white with a fine-textured matt finish. A close-fitting side cladding with rain hood and integrated rain drainage gutters support weather protection. The solidly manufactured support posts are made from anodised aluminium profile, are also powder-coated in RAL 9016 Traffic white and form a particularly stable, durable base for the freestanding unit.

Each of the 13 mail compartments has approximately 12 litres of volume. The 35 × 265 mm letter slot is designed for DIN C4 items in portrait orientation. A noise-dampening rubber lip reduces the impact of the letter flap. Mail is retrieved from the front; the retrieval doors open from left to right. Each mailbox is supplied with two keys bearing a key number and a replaceable nameplate located beneath the letter flap.

The advantages of the BASIC 385P mailbox system at a glance

Integrated bell-function box on the left

The unit combines 13 mailboxes with 13 stainless-steel doorbell buttons and an intercom aperture with a universal adapter. This creates a central, tidy solution for mail and visitor communication.

Solid aluminium support posts

Solidly manufactured anodised aluminium profiles form the stable base of the freestanding unit. The powder-coated construction combines high load-bearing capacity with a durable finish for outdoor use.

DIN C4 letter slot with 12-litre volume

Each mailbox offers approximately 12 litres of mail volume. The 35 × 265 mm letter slot accepts DIN C4 items in portrait orientation without larger envelopes needing to be unnecessarily folded.

Prepared for door communication

The intercom aperture with universal adapter is prepared for many commercially available flush-mounted speakers.

Robust BASIC quality in RAL 9016 Traffic white

Galvanised steel, stainless-steel components, solid aluminium support posts and German manufacturing result in a durable mailbox system for long-term use at the property entrance.

Equipment of the BASIC 385P mailbox system

Mailbox system

Number of mailboxes 13 separately usable mail compartments
Mailbox dimensions 300 × 110 × 385 mm (W × H × D) per compartment
Mail volume Approx. 12 litres per mailbox
Material Galvanised steel; side cladding and rain hood made of stainless steel V2A
Finish RAL 9016 Traffic white, fine-textured matt
Letter slot 35 × 265 mm, suitable for DIN C4 portrait
Standard Mailboxes conforming to DIN EN 13724

Bell and intercom unit

Bell-function box Galvanised steel, powder-coated to match
Position Left
Doorbell buttons 13 round stainless-steel doorbell buttons Type 4
Intercom aperture With universal adapter for commercially available flush-mounted speakers
Nameplate Designed to resist indenting and impact

Solid aluminium support posts

Support posts Solidly manufactured, anodised aluminium profile
Coating Powder-coated in RAL 9016 Traffic white
Installation methods Either bolted installation or embedding in concrete
Bolted installation Support posts selectable in 1200 or 1600 mm
Concrete embedding Support posts selectable in 1600 or 2000 mm
Delivery condition Support posts and mailbox system delivered in assembly-ready sections
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Note on the bell/intercom unit

The universal adapter is suitable for many commercially available flush-mounted speakers. Intercom systems or built-in speakers, the power supply and cabling are not part of the described basic equipment and must be provided to suit the planned system.

Installation on a foundation

For bolted installation a flat and sufficiently load-bearing foundation is required. The fastening elements must be selected to suit the foundation, the weight of the unit and the local installation situation.

Installation by embedding in concrete

For the concrete-embedded version the extended aluminium support posts are anchored plumb in a sufficiently dimensioned concrete foundation. Foundation size and embedment depth must be matched to the ground conditions, unit dimensions and local loads.

Note on weather protection

The rain hood, close-fitting side cladding and rain drainage gutters support weather protection. Mail items must be fully inserted so that the letter flaps can close completely. Under extreme weather conditions, slight moisture ingress may occur despite compliant construction.

Product properties

Material	Steel, galvanised, Aluminium AlMg3 W19, Stainless steel V2A 1.4301
Series	BASIC
Functions	Light button, Intercom
Functional box prepared for manufacturer	GIRA, Busch Jaeger, Siedle, STR Elektronik, ELCOM, TCS, Ritto, ALGO, Telegärtner, Auerswald, Legrand Bticino, Comelit
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Mounting type	Free-standing
Removal of mail	On the front
Surface/colour	RAL 9016 traffic white
Number of boxes	with 13 letterboxes
