Regendach "DESIGNER"

Für Aufputz-, Zaun- und Standbriefkästen der Kollektion Designer liegt ein Regendach bei. Dieses ist selbstklebend und nach erfolgreicher Montage oben auf dem Briefkasten aufzusetzen. Achten Sie dabei auf eine genaue Ausrichtung!

stainless steel mailbox freestanding designer Big ST-R- house number back illuminated- individually

High quality mailbox free-standing the brand mailbox manufactory with extra volume (21 liters) & extra large throw-in (6.3cm x 35cm). The house number is always clearly visible at night. There are no rivets or screws visible. The mailbox is also made of 2mm stainless steel V2A 1,4301, sanded and can still be exchanged for a new mailbox module after many years. Clear line and straightforward design characterize the designer mailbox free-standing. Our products have a high value, reliable functionality and their own identity. Made by mailbox manufactory.

- very high quality manual work!
- The mailbox made of 2mm stainless steel V2A 1.4301, 240 grain. Dimensions: height 750 mm; Width: 450 mm; Depth 100 mm.
- Fronts side post-withdrawal door 350 mm x 300 mm, to open from top to bottom. Including 2 key with key number.
- Settling from the front, dimensions of the insertion: W 35 cm x H 6.3 cm, C4 across. Here, very large letters fit without kinking.
- **from now on with built-in damping elements, which let the throw-in flap slowly and quietly close.**
- House number approx. 70mm high (max. 3-digit) with power-saving LED lighting 12V DC approx. 50mA / 1W, white.
- optionally interchangeable name tag made of stainless steel with laser lettering or name tag made of plexi.
- 8-12V DC Kurzhub bell button with LED ring lighting (blue, white, red or green). The lighting of the bell button cannot be supplied by the control unit. It must be connected to an additional power supply 8-12 V DC.
- Optional is an 8-12V DC short-lived light button with pictogram.
- Preparation (installation speaker not included) for intercom.
- Optional with universal adapter for all commercially available installation speakers.
- Optional preparation (not included in the scope of delivery) for a camera.
- The stand columns consist of 60.3 mm stainless steel V2A 1,4301, ground. Invisible cable routing through the stand columns.

important information

camera or voice center preparation

We always recommend the electrical installation to be carried out by an electrical installer.

We offer the preparation of cameras & speakers from different manufacturers for our mailboxes. The preparation does not contain any end devices, which are the provision of the screw recordings, bores and perforations. So that you can easily install your device.

water protection

In order to achieve optimal water protection of your post, the mailbox or the mailbox system should be under a canopy if possible. If you set up this system completely freely, it is recommended to use a rain roof. Connected self-adhesive rain roof included. The post office is only protected from water if it is completely stored in the box and the throw-in flap is closed. Unskinned mail enables the penetration of moisture and dirt into the mailbox. It is therefore necessary to plan sufficiently dimensioned mailboxes for the upcoming need. In certain extreme weather conditions, water can still occur (according to DIN EN 13724 to 1ccm). This is not a reason for complaint.

Abmessungen & Details

Number of parties:	1
Item withdrawal:	Front
Base material:	Stainless steel
Height single box in cm:	71,0 75,0
