Design surface-mounted letterbox GOETHE AP - RAL colour of your choice - prepared for LOXONE Intercom/Code Touch | without newspaper compartment | 200mm depth | Prepared for a 1x1 LOXONE Intercom

Product number 215-AP-1-SP-LOX1-200

Product description

Design surface-mounted mailbox GOETHE® AP with newspaper compartment - RAL colour of your choice - LOXONE Intercom prepared

Premium-crafted surface-mounted mailbox in a flush design. The modern GOETHE® mailbox is ideal for an upscale entrance area. The linear shape without a visible lock makes this mailbox appear particularly elegant. The LOXONE Intercom can be seamlessly integrated into the flush design and exchanged at any time. The preparation is provided for 1 × LOXONE Intercom (incl. cut-out for sound output) or 1 × LOXONE Intercom (incl. cut-out for sound output) + 1 × LOXONE NFC Code Touch/Touch Pure.

The dimensions of the single box provide a capacity of approx. 16 litres; the large letter slot guarantees that DIN C4 envelopes and magazines — or post accumulated during several days of absence — are not creased. The innovative push-key lock is concealed invisibly inside the mailbox. The key is simply inserted into the existing opening (no turning required) and the door opens. The placement of the lock is designed so that the retrieval door prevents your post from falling out towards you. Thanks to the water-drip edge, the internal post is optimally protected from the weather. The insertion flap is fitted with high-quality pivot dampers, ensuring quiet closing and preventing any disturbing rattling caused by the weather.

The surface-mounted mailbox systems of the GOETHE® collection are characterised by the consistent use of stainless steel and aluminium. The result is very high durability and sustainability. The construction has been developed by our own engineers with a view to high flexibility and modularity, easy spare-part assembly and straightforward self-installation. Spare parts for all GOETHE® systems are available directly in our shop.

Thanks to the design, self-installation is uncomplicated.

Protected utility model under DPMA file reference DE: 20 2021 101 679.5

- Optimal weather protection through water-drip edges and a rain canopy made of 3 mm aluminium AlMg3 W19, powder-coated in RAL colour of your choice.
- Side cladding made of 3 mm aluminium AlMg3 W19, powder-coated in RAL colour of your choice.
- Includes mounting rail for wall installation.
- **WITHOUT LOXONE Intercom / system components!**

Important information

Camera or intercom unit preparation

We always recommend that the electrical installation be carried out by a qualified electrician.

We offer preparation for intercom units from various manufacturers for our mailboxes. The preparation does not include end devices; it comprises the provision of screw mounts, drillings & cut-outs, so that you can mount your end device without difficulty.

Water protection

To achieve optimal protection of your post from water, the mailbox or mailbox system should, where possible, be located under an overhang.

Post is only protected from water if it is placed completely inside the box and the insertion flap is closed. Post that is not fully inserted allows moisture and dirt to enter the mailbox. This system is protected against ingress of water according to DIN EN 13724. Water ingress is not a basis for a complaint.
