12-unit 8x2 freestanding mailbox system Design BASIC 385P-7016-SP with doorbell panel - RAL 7016 anthracite grey | RAL 7016 Anthracite grey, fine texture, matt | Right | with 12 mailboxes (2x8)

Product number 385P-7016-12-SP-R

Product description

Freestanding mailbox system BASIC 385P with bell/intercom module on the right for 12 households – RAL 7016 Anthracite grey

The freestanding BASIC 385P mailbox system for 12 households combines 12 individually usable mail compartments with an integrated bell function enclosure. This brings mail reception, doorbell buttons and preparation for a compatible door intercom system together in a robust, visually unified entrance solution for larger apartment buildings, residential complexes and commercial properties. In this variant, the bell/intercom module is positioned to the right of the mailbox system.

The mailboxes are made from galvanised steel and are finished in RAL 7016 Anthracite grey fine-texture matt powder coating. A close-fitting side cladding with rain canopy and integrated rain drainage channels support weather protection. The solidly manufactured support posts from anodised aluminium profile are also powder-coated in RAL 7016 Anthracite grey and form a particularly stable, durable base for the freestanding unit.

Each of the 12 mail compartments has approx. 12 litres of volume. The 35 × 265 mm mail slot is designed for DIN C4 items in portrait orientation. A noise-damping rubber lip reduces the impact of the flap. Mail is retrieved from the front; the access doors open from left to right. Each mailbox is supplied with two keys with key number and a changeable nameplate located below the mail slot.

The advantages of the BASIC 385P mailbox system at a glance

Integrated bell function enclosure on the right

The unit combines 12 mailboxes with 12 stainless steel doorbell buttons and a speaker aperture with universal adapter. This creates a central, neat solution for mail and visitor communication.

Solid aluminium support posts

Solidly manufactured, anodised aluminium profiles form the stable base of the freestanding unit. The powder-coated construction combines high load capacity with a durable finish for outdoor use.

DIN C4 mail slot with 12-litre volume

The mailboxes each offer approx. 12 litres of postal volume. The 35 × 265 mm mail slot accepts DIN C4 items in portrait orientation without larger envelopes being unnecessarily folded.

Prepared for door communication

The speaker aperture with universal adapter is prepared for many commercially available flush-fit speakers.

Robust BASIC quality in RAL 7016 Anthracite grey

Galvanised steel, stainless steel components, solid aluminium support posts and German manufacturing result in a resilient mailbox system for long-term use at the property entrance.

Equipment of the BASIC 385P mailbox system

Mailbox system

Number of mailboxes 12 individually usable mail compartments
Mailbox dimensions 300 × 110 × 385 mm (W × H × D) per compartment
Mail volume Approx. 12 litres per mailbox
Material Galvanised steel; side cladding and rain canopy in stainless steel V2A
Finish RAL 7016 Anthracite grey fine-texture matt
Mail slot 35 × 265 mm, suitable for DIN C4 portrait
Standard Mailboxes conforming to DIN EN 13724

Bell and intercom module

Bell function enclosure Galvanised steel, powder-coated to match
Position Right
Doorbell buttons 12 round stainless steel doorbell buttons Type 4
Speaker aperture With universal adapter for commercially available flush-fit speakers
Nameplate Constructed to resist indenting and impact-resistant

Solid aluminium support posts

Support posts Solidly manufactured, anodised aluminium profile
Coating Powder-coated in RAL 7016 Anthracite grey
Mounting options Choice of screw mounting or concreting in
Screw mounting Support posts available in 1200 or 1600 mm
Concreting in Support posts available in 1600 or 2000 mm
Delivery condition Support posts and mailbox system delivered split for installation
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Note about the bell/intercom module

The universal adapter is suitable for many commercially available flush-fit speakers. Intercom systems or flush-fit speakers, power supply and cabling are not part of the described basic equipment and must be provided to suit the planned system.

Installation on a foundation

For screw mounting a flat and sufficiently load-bearing foundation is required. Fixings must be selected to suit the foundation, unit weight and local installation conditions.

Installation by concreting in

For the concreting-in version the extended aluminium support posts are set plumb and anchored in a sufficiently dimensioned concrete foundation. Foundation size and embedment depth must be adapted to ground conditions, unit dimensions and local loads.

Note about weather protection

The rain canopy, close-fitting side cladding and rain drainage channels support weather protection. Postal items must be fully inserted so that the flap can close completely. Under extreme weather conditions, slight moisture ingress may occur despite compliant construction.

Product properties

Material	Steel, galvanised, Aluminium AlMg3 W19, Stainless steel V2A 1.4301
Series	BASIC
Number of bell push buttons	12 buttons
Functions	Light button, Intercom
Functional box prepared for manufacturer	GIRA, Busch Jaeger, Siedle, STR Elektronik, ELCOM, TCS, Ritto, ALGO, Telegärtner, Auerswald, Legrand Bticino, Comelit
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Mounting type	Free-standing
Surface/colour	RAL 7016 anthracite grey
Removal of mail	On the front
Number of boxes	with 12 letterboxes
