Eingebaute Dämpfungselemente lassen die Einwurfklappe langsam und leise schließen

2-part 2x1 stainless steel mailbox system DESIGNER Style BIG

High quality Built-in letter box system of the brand mailbox manufactory completely made of stainless steel. A real eye-catcher among the mailboxes. Clear lines and straightforward design are characterized by our style collection. The continuous front panel results in a completely flush design without visible screw connection, which leads to a unique appearance. With a lot of volume for very large amounts of posts.

Our products have a high value, reliable functionality and their own identity. Made by mailbox manufactory.

- 2-part stainless steel plastering box made of 2 mm stainless steel V2A, ground.
- 21 liters of volume, up to 31 liters of capacity due to optional mailbox depth.
- Continuous front panel made of 2mm stainless steel without visible screw connection.
- Fronts side post-withdrawal door 350 mm x 300 mm, to open from top to bottom. Including 2 key with key number per party.
- Settling from the front, dimensions of the insertion: W 35 cm x H 6.3 cm, C4 across. Here, very large letters and newspapers fit in without kinking.
- With built-in damping elements, which let the throw-in flap slowly and quietly close.
- Water protection sheet Inner loungers per party.
- Optionally with interchangeable antivandalism name sign made of plexiglass including tools.
- Dimensions Front panel: W 45 cm x H 106 cm x D 0.2 cm.
- Dimensions: W 41 cm x H 102 cm x D 10 cm / 15 cm.
- Incl. Care cloths and assembly aids.

Important information

Assembly

We always recommend assembling this system through a specialist company with experience in the area of mailbox systems. Due to the design, 2 people may make sense for the assembly.

Water protection

In order to achieve optimal water protection of your post, the mailbox or the mailbox system should be under a canopy if possible. The post office is only protected from water if it is completely stored in the box and the throw-in flap is closed. Unskinned mail enables the penetration of moisture and dirt into the mailbox. It is therefore necessary to plan sufficiently dimensioned mailboxes for the upcoming need. In certain extreme weather conditions, water can still occur (according to DIN EN 13724 to 1ccm). This is not a reason for complaint.
