## Design parcel box GOETHE with 1 letterbox - lock system - RAL of your choice

Parcel delivery has changed dramatically in recent years - today's customers expect more flexibility and security than ever before. With the GOETHE parcel letter box from Briefkasten Manufaktur, you can rely on an optimum combination of innovative technology and outstanding design, made from high-quality stainless steel and aluminum.

The GOETHE parcel letterbox has a specially designed delivery lock. As soon as the parcel carrier places your parcel in it and closes the lock, the parcel automatically falls into the securely locked removal box below. After this process, the delivery lock is immediately ready for further deliveries and is automatically isolated from the removal box, guaranteeing maximum security for your parcels. A parcel box for the simple receipt of parcels, parcel receipt independent of the delivery agent! Any parcel delivery company (e.g. DHL, DPD, TNT, GLS, Hermes, etc.) can use this parcel box. The spacious interior of the GOETHE parcel letterbox is designed to accommodate the DHL Paket M and even several smaller parcels. Depending on the placement of the DHL size M parcel, four such parcels can even be stored safely and conveniently.

The dimensions of the letterbox allow for a capacity of approx. 32 liters, and the large slot guarantees no crumpled mail, even with DIN C4 envelopes and magazines or after several days of absence. The innovative push-key lock is concealed inside the letterbox. The key is simply inserted into the existing opening (no turning necessary) and the door opens. With the arrangement of the lock, this letterbox is designed in such a way that the removal door prevents the mail from falling towards you. The water drainage edge ensures that the mail inside is optimally protected from the weather. The insertion flap is fitted with high-quality axle dampers, guaranteeing quiet closing and eliminating the annoying rattling caused by the weather.

Briefkasten Manufaktur attaches particular importance to the selection of high-quality materials. The use of stainless steel in the production of the GOETHE parcel letter box ensures extremely high corrosion resistance and a strikingly attractive surface finish. Our quality assurance begins with the selection of our raw material suppliers and only ends when the parcel letter box arrives at your premises in the required quality. Rely on the GOETHE parcel letterbox for a secure, flexible and stylish solution to your parcel delivery needs. Let yourself be convinced by a product that combines traditional craftsmanship with state-of-the-art technology - in the spirit of letterbox manufacturing.

### Protected utility model according to DPMA file number DE: 20 2021 101 679.5

- High-quality parcel letterbox made of stainless steel and aluminum.
- Quality production - Made in Germany by Briefkasten Manufaktur Lippe.

- Base made of 40x40x2mm stainless steel tube 1.4301 V2A, powder-coated in RAL of your choice.
- Invisible fastening in the pillar. The overall height is 1.45 m.

### Important information

#### Water protection

To achieve optimum water protection for your mail, the letterbox or letterbox system should be located under a canopy if possible.

The mail is only protected from water if it is fully inserted in the box and the flap is closed. Mail that is not fully inserted allows moisture and dirt to enter the letterbox.

This system is protected against the ingress of water in accordance with DIN EN 13724. Water ingress is not a reason for complaint.
