Product description

Slim surface-mounted mailbox system BASIC 385A for 2 households – BI-Color RAL 7016 / stainless steel

The BASIC 385A surface-mounted mailbox system for 2 households is a robust wall solution for two-family houses, houses with a granny flat and smaller office buildings. The vertically arranged S configuration reduces horizontal space requirements and uses the available wall height particularly efficiently.

The BI-Color version combines anthracite grey powder-coated mailbox bodies with brushed stainless steel V2A elements. The material contrast gives the BASIC system a high-quality, modern appearance.

Each mailbox measures 300 × 110 × 385 mm (W × H × D) and offers approx. 12 litres of volume. The 35 × 265 mm mail slot is designed for DIN C4 items in portrait format. The doors open from left to right; each mailbox includes two keys with key number and an interchangeable nameplate beneath the mail slot.

The advantages of the BASIC 385A surface-mounted system at a glance

Rain hood and side panels

Rain hood and side panels combine the individual mailbox compartments into a single surface-mounted unit. The coordinated cladding provides a calm front and a neat finish at the façade.

DIN C4 mail slot and 12-litre capacity

The 300 × 110 × 385 mm (W × H × D) mailbox compartments each offer approx. 12 litres of volume. The 35 × 265 mm mail slot also accepts larger DIN C4 items in portrait format.

Quiet insertion and secure allocation

The rubber lip damps the mail flap. Robust locks, two keys with key number and protected interchangeable nameplates ensure clear assignment of the individual mailbox compartments.

Mounting rail for wall installation

The surface-mounted system is designed for direct façade installation. A mounting rail simplifies installation; fixings with screws and wall plugs are included in the described configuration.

BI-Color in anthracite and stainless steel

RAL 7016 anthracite grey fine-structure matt is combined with brushed stainless steel accents, creating a striking material contrast. The system is manufactured in Germany at the Briefkasten Manufaktur.

Note on wall mounting

The wall must be even and sufficiently load-bearing. The supplied screws and wall plugs should only be used if they are suitable for the existing wall construction; for other substrates or external thermal insulation composite systems (ETICS) appropriate fixings must be specified on site.

Note on weather protection

Mail is best protected from moisture and dirt only when items are fully inserted and the mail flap is closed. Protruding letters or magazines can prevent the flap from closing completely.
