## COMELIT Call forwarding module - Gateway

This gateway makes it possible to receive the door call, for up to 4 subscribers, of a Simplebus 2 system with art. 1209 or art. 1210A on the smartphone (iOS or Android), without having installed an indoor station.

For the function you only need the audio-video unit Art. 4681/4 or Art. UT2020/4, the power supply unit Art. 1209 or Art. 1210A. The gateway is connected to the router and the registration is done via QR code per housing unit. The QR codes for Simplebus address 1, 2, 3 and 4 are included in the delivery of Art. 1406A4 and there are no license costs. **The module supports a maximum of 4 apartments and 15 enabled apps per apartment.**

After installing the system and the free available app for your smartphone (Apple iOS or Android), you can connect the two in a few and very simple steps. This also requires a one-time registration with the Comelit Cloud. After that, you can access your video intercom from anywhere in the world. Image and sound are transmitted smoothly and in a high quality. Both communication and opening the front door or gate entrance is possible via the app.

### Important information

#### Camera or intercom preparation

Intercom systems must be connected by an electrician. Contact your trusted electrician for planning, installation and setup.
