Stainless steel house number Heym 240mm

Heym is a house number for those who like it businesslike and modern. This house number convinces not only by its clear appearance, but also by a very simple assembly. It is attached from the front with visible stainless steel screws, spacers provide the distance to the wall. The numbers are lasered out of brushed stainless steel sheet and thus give - depending on the design - a clear view of the background (house wall) or a colored painted background. This interplay of color and stainless steel creates very interesting contrasts.

- House number lasered from brushed stainless steel sheet or stainless steel, powder coated, gives the view to the underground.
- Mounting with a distance to the wall
- Digit height approx. 17.5 cm
- Material thickness 2 mm
