2-compartment Stainless steel free-standing letterbox BASIC Plus 592C ST-P - Bell box - INDIVIDUAL

This 2-compartment mailbox system combines the highest quality and modern design. The system is completely made of stainless steel V2 A 1.4301, ground. The grinding pattern captivates by the charisma of highest elegance. Extremely high quality workmanship and the sophisticated concept make this 2-compartment free-standing letterbox our top seller. A rain drainage edge for optimal water protection, rubber buffers for quiet insertion and the very robust change name plate distinguish this free-standing letterbox.
The elegant rectangular columns are solidly manufactured from 2 mm stainless steel V2A 1.4301, ground and optionally equipped with a 10mm thick base plate for screw mounting.
Thanks to the construction method, self-assembly is uncomplicated.
The letterbox system is created by the letterbox manufactory. 100% Made in Germany, Bad Salzuflen.

- **free-standing letterbox system for 2 parties with letterboxes made of stainless steel V2A 1.4301, ground.**
- The withdrawal doors can be opened from left to right with rain drain edge for optimal water protection.

- Preparation (built-in speaker not included) for intercom possible.
- Optional with universal adapter for all commercially available built-in speakers.
- Optional preparation (camera not included) for a camera.
- Invisible cable feed through the stand elements possible.

Important information

Camera or speaker preparation

We recommend that the electrical installation is always carried out by an electrical installer.

We offer the preparation of cameras & intercoms of different manufacturers for our mailboxes. The preparation does not include terminal equipment, it is the provision of the screw mounts, holes & perforations. So that you can mount your terminal device without any problems.

Water protection

In order to achieve optimal water protection for your mail, the mailbox or mailbox system should be located under a canopy if possible. Mail is only protected from water if it is completely inserted in the box and the insertion flap is closed. Mail that is not completely inserted allows moisture and dirt to enter the mailbox. Therefore, it is necessary to plan sufficiently sized mailboxes for the upcoming needs. In certain extreme weather conditions, water can still enter (according to DIN EN 13724 up to 1ccm). This is not a reason for complaint.

Abmessungen & Details

Number of parties:	2
Item withdrawal:	Front
Base material:	Stainless steel
Height single box in cm:	33,0
