Wall pass-through letterbox BASIC 622 - stainless steel V2A ground - 6 parties

The stainless steel wall pass-through letterbox has plenty of volume for receiving mail and is variable in depth from 290 - 440 mm, in order to optimally adapt to your wall thickness (30 degree angle running diagonally to the rear). Each single mailbox has a size of 300 x 110 x 290 to 440 mm (WxHxD). The boxes comply with the current EN standard 13724 so that e.g. A4 envelopes can be inserted unbent and protection against break-in is guaranteed.
Great advantage of a wall pass-through letterbox system, it is well protected from the weather and therefore very durable. Also well suited for installation in wall columns. A quality product made in Germany.

- 6 parties wall pass-through letterbox system made of stainless steel V2A, brushed
- Removal door without end frame (for an even look without interruptions). Front panel is attached to the plaster.
- Inclined, pull-out box made of galvanized steel, powder painted in RAL 9007.
- Depth variable from 290mm - 440m, 30 degree angle sloping to the back.
- The mailbox complies with DIN/EN 13724. Insertion size (3.5 cm x 26.5 cm) for C4 high, here fit even large letters without bending.
- Insertion flaps with noise-dampening rubber buffers for very quiet insertion of mail.
- The removal door can be opened from left to right.
- Incl. 2 keys with key number & changeable name plate under the access flap.
- The inscriptions of the name plates can be exchanged as desired
- Assembly instructions included.
