Design letterbox pedestal GRIMM - polished stainless steel - GIRA System 106 - 3-gang prepared | Prepared for Gira System 106 | Front mail retrieval | Stainless steel, brushed

Product number 562-STL-SPO-1-VA-GI106V

Product description

Design Mailbox Column GRIMM – A Masterpiece of Mailbox Manufacturing

The GRIMM mailbox column combines modern design with first-class craftsmanship – ideal for discerning builders and architects seeking an elegant solution for integrating the Gira System 106. Manufactured from high-quality stainless steel and fully “Made in Germany” by the Lippe Mailbox Manufacturer, this model embodies durability, functionality, and stylish aesthetics. The polished front panel made of 2 mm stainless steel V2A 1.4301 features a timeless appearance and high corrosion resistance. The flush design enables seamless integration of up to three GIRA 106 system modules (not included) through a thoughtful mounting system. The optional surface-mounted housing (5503910) is required for the installation of the Gira components.

The GRIMM mailbox® is not only a visual highlight but also excels in functionality and quality. Thanks to the innovative push-key lock, the mailbox can be easily and comfortably operated with one hand. Open the door with a push and close it without the use of a key. The lock is optimally protected against weather conditions. Additionally, the mailbox features an intelligent retrieval system: the door opens from top to bottom, ensuring that the mail remains securely inside the box and cannot fall out. The mail slot also allows for convenient front access, with high-quality axle dampers providing a smooth closure of the mail flap. What sets the GRIMM apart is the double-box system: the installation box can already be installed during the shell construction phase, while the front panel is mounted only after the construction work is complete – ensuring maximum flexibility for the future and protection from dirt and dust during the building phase. The input box is made of stainless steel 1.4016 and features pre-punched cable entries on all sides for easy electrical installation.

Thanks to the DIN/EN 13724 standard, the GRIMM is ideal for large letters in C4 format, which can be inserted without creasing. The GRIMM mailbox® impresses with its durable quality, timeless design, and thoughtful functionality.

A notable feature of the Design Mailbox Column GRIMM is the fully welded stand column made of solid stainless steel V2A 1.4301. This construction guarantees maximum stability and an extraordinarily long lifespan – even with continuous use outdoors. The fully welded design creates a seamless, robust body without visible screws or connectors, which not only underscores the elegant appearance but also prevents the ingress of moisture and dirt. The precisely ground seams ensure a uniform appearance and give the column a particularly high-quality look. Furthermore, the construction allows for invisible cable management within the column, so all electrical connections for the DoorBird video intercom system and other smart home components can be safely and securely installed. This unique manufacturing process sets new standards in design and functionality and makes the GRIMM mailbox column a future-proof solution for modern architectural projects.

- High-quality mailbox column entirely made of stainless steel for free-standing installation.
- Front panel made of 2 mm stainless steel V2A 1.4301, polished.
- Quality manufacturing – Made in Germany by Lippe Mailbox Manufacturer.
- The Gira System 106 can be seamlessly integrated into the flush design. Preparation is provided for 3 pieces of GIRA 106 system modules. The modules can be flush-mounted through the simple mounting system (surface-mounted housing 5503910 required!). WITHOUT GIRA system components!
- Innovative push-key lock including 2 keys with key number, convenient locking without a key, optimally protected against weather.
- The retrieval door with opening limiter opens from top to bottom to prevent mail from falling out.
- Front mail slot with high-quality axle dampers for very quiet mail insertion.
- DIN/EN 13724 compliant mailbox, slot size (3.5 cm x 32.5 cm) for C4 landscape – even large letters remain intact. Additional retrieval protection integrated from stainless steel.
- Optimal weather protection through recessed panel.
- Double box system: The panel can be comfortably installed after the completion of the construction work and exchanged at any time.
- The fully welded stand column is made of 2mm stainless steel V2A 1.4301, polished. The construction height is 1.70 m.
- Invisible cable entry through the body is possible.
- The column is equipped with a base plate made of stainless steel. This is 10 mm thick and is enhanced with a cover panel, concealing the mounting anchors.

Important Information:

To achieve optimal water protection for your mail, the mailbox or mailbox system should ideally be located under a canopy.

Postal items are only protected from water if they are completely placed in the box and the mail slot is closed. Mail that is not fully inserted allows moisture and dirt to enter the mailbox. This system is protected against water ingress according to DIN EN 13724. Water ingress is not a reason for complaint.

Product properties

Series	GRIMM
Functions	Camera, Intercom, Fingerprint, Keypad
Functional box prepared for manufacturer	GIRA
Mounting type	Free-standing
Material	Stainless steel V2A 1.4301, Stainless steel 1.4016 (non-rusting magnetic stainless steel)
Removal of mail	On the front
Number of boxes	with 1 letterbox
Surface/colour	Brushed
Boxes by volume	Large > 16 litres
