9-compartment freestanding mailbox Design BASIC 385P ST-T with doorbell panel - stainless steel, RAL 7016 anthracite | Right | BI-Color brushed stainless steel | RAL 7016 anthracite grey | with 9 mailboxes

Product number 385P-7016VA-9S-SP-R

Product description

Freestanding mailbox system BASIC 385P with bell/intercom module on the right for 9 households – BI-Color stainless steel / RAL 7016 – narrow version

The freestanding BASIC 385P mailbox system for 9 households combines 9 separately usable mail compartments with an integrated bell function box. This brings mail reception, doorbell buttons and the provision for a compatible door intercom system together in a robust, visually unified entrance solution for larger apartment buildings, residential complexes and commercial properties. In this variant, the bell/intercom module is positioned to the right of the mailbox system.

The mailbox bodies are made of galvanized steel and are matt powder-coated in RAL 7016 anthracite grey with a fine texture. Brushed stainless steel inlet flaps provide a high-quality BI-Color accent. Side cladding and rain hood are made of V2A stainless steel and are powder-coated to match in RAL 7016. Particularly characteristic are the solid support posts made from anodised aluminium profiles, which are also coated in anthracite grey and give the system a secure, very robust base.

Each of the 9 mail compartments has approximately 12 litres of volume. The 35 × 265 mm inlet opening is designed for DIN C4 items in portrait format. A noise-dampening rubber lip reduces the impact of the inlet flap. Mail is retrieved from the front; the access doors open from left to right. Each mailbox is supplied with two keys stamped with the key number and a changeable nameplate located beneath the inlet flap.

The advantages of the BASIC 385P mailbox system at a glance

Integrated bell function box on the right

The system combines 9 mailboxes with 9 stainless steel bell push-buttons and a speak-through opening with a universal adaptor. This creates a central, tidy solution for mail and visitor communication.

Solid aluminium support posts

Solidly manufactured anodised aluminium profiles form the stable base of the freestanding system. The powder-coated construction combines high load-bearing capacity with a durable outdoor finish.

DIN C4 inlet with 12-litre volume

Each mailbox offers approximately 12 litres of mail volume. The 35 × 265 mm inlet opening accepts DIN C4 items in portrait format without larger envelopes needing to be unnecessarily folded.

Prepared for door communication

The speak-through opening with universal adaptor is prepared for many commercially available flush-mounted speakers.

BI-Color stainless steel / RAL 7016

Brushed stainless steel inlet flaps create a high-quality contrast to the anthracite-grey mailbox bodies. The robust material combination pairs a modern appearance with durable everyday suitability.

Equipment of the BASIC 385P mailbox system

Mailbox system

Number of mailboxes 9 separately usable mail compartments
Mailbox dimensions 300 × 110 × 385 mm (W × H × D) per compartment
Mail volume Approx. 12 litres per mailbox
Material Galvanized steel; side cladding and rain hood made of V2A stainless steel
Finish BI-Color: RAL 7016 anthracite grey with brushed stainless steel inlet flaps
Inlet opening 35 × 265 mm, suitable for DIN C4 portrait
Standard Mailboxes in accordance with DIN EN 13724

Bell and intercom module

Bell function box Galvanized steel, powder-coated to match
Position Right
Bell push-buttons 9 round stainless steel bell push-buttons Type 4
Speak-through opening With universal adaptor for commercially available flush-mounted speakers
Nameplate Designed to be tamper-proof and impact-resistant

Solid aluminium support posts

Support posts Solidly manufactured anodised aluminium profile
Coating Powder-coated in RAL 7016 anthracite grey
Mounting options Choice of screw mounting or setting in concrete
Screw mounting Support posts selectable in 1200 mm or 1600 mm
Set in concrete Support posts selectable in 1600 mm or 2000 mm
Delivery condition Support posts and mailbox system delivered divided for assembly
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Note on the bell/intercom module

The universal adaptor is suitable for many commercially available flush-mounted speakers. Intercom systems or flush-mounted speakers, power supplies and cabling are not part of the described basic equipment and must be provided to suit the planned system.

Mounting on a foundation

For screw mounting, a level and sufficiently load-bearing foundation is required. Fixings must be selected to suit the foundation, system weight and the local installation situation.

Set in concrete

For the set-in-concrete version, the extended aluminium support posts are anchored plumb in a suitably dimensioned concrete foundation. Foundation size and embedment depth must be matched to ground conditions, system dimensions and local loads.

Note on weather protection

The rain hood, close-fitting side cladding and rain drainage channels support weather protection. Mail items must be fully deposited so that the inlet flaps can close completely. Under extreme weather conditions, a small amount of moisture may penetrate despite construction in accordance with standards.

Product properties

Material	Steel, galvanised, Aluminium AlMg3 W19, Stainless steel V2A 1.4301
Series	BASIC
Number of bell push buttons	9 buttons
Functions	Light button, Intercom
Functional box prepared for manufacturer	GIRA, Busch Jaeger, Siedle, STR Elektronik, ELCOM, TCS, Ritto, ALGO, Telegärtner, Auerswald, Legrand Bticino, Comelit
Number of boxes	with 9 letterboxes
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Mounting type	Free-standing
Surface/colour	RAL 7016 anthracite grey, Brushed
Removal of mail	On the front
