Eingebaute Dämpfungselemente lassen die Einwurfsklappe langsam und leise schließen

Stainless steel free-standing letterbox Designer Model BIG ST-P - GIRA System 106 lateral - 3-compartment prepared - RAL at choice

High-quality manufactured free-standing letterbox of the brand letterbox manufacture with powder-coated front panel in RAL color in extra large format. Gira System 106 can be used seamlessly in flush design. The preparation is intended for 3 pieces GIRA 106 system modules. The modules can be used flush with the surface thanks to the simple holding system (surface-mounted housing 5503910 required!).

This is a real eye-catcher among the letterboxes. Clear lines and no-frills design characterize the designer mailbox with GIRA System 106. Our products have a high value, reliable functionality and their own identity. Made by Briefkasten Manufaktur. In the ST-P edition with flush design. The elegant rectangular pillars are made of solid 2 mm stainless steel V2A 1.4301, polished and optionally equipped with a 10mm thick base plate for screw mounting.

Our products have a high value, reliable functionality and their own identity. Made by Briefkasten Manufaktur.

- Designer stainless steel free-standing letterbox made of 2mm stainless steel V2A 1.4301, front panel powder coated in RAL color; dimensions single box: height 550 mm; width: 600 mm; depth 100 mm.
- Frontal mail removal door 320 mm x 300 mm, to be opened from top to bottom. Incl. 2 keys with key number.
- Mail slot from front, dimensions of slot: W 32 cm x H 6.3 cm, C4 landscape. Very large letters fit in here without bending. Attention no removal protection!
- With built-in damping elements, these let the insertion flap close slowly and quietly.
- The W 20 mm x D 100 mm columns are made of 2mm stainless steel V2A 1.4301, powder coated in RAL color for setting in concrete or for screw mounting. Invisible cable routing through the columns.

• **WITHOUT GIRA system components!**

Important information

Camera or intercom preparation

We recommend that the electrical installation is always carried out by an electrician.

We offer the preparation of cameras & intercoms of different manufacturers for our mailboxes. The preparation does not include terminal equipment, it is the provision of the screw mounts, holes & perforations. So that you can mount your terminal device without any problems.

Water protection

In order to achieve optimal water protection for your mail, the mailbox or mailbox system should be located under a canopy if possible. If you install this system completely free, it is recommended to use a rain canopy. Close-fitting self-adhesive rain canopy enclosed.

Mail is protected from water only when it is completely inserted in the box and the insertion flap is closed. Mail that is not fully inserted allows moisture and dirt to enter the mailbox. Therefore, it is necessary to plan sufficiently sized mailboxes for the upcoming needs. In certain extreme weather conditions, water can still enter (according to DIN EN 13724 up to 1ccm). This is not a reason for complaint.

Abmessungen & Details

| | |
|------------------------------|--|
| Number of parties: | 1 |
| Item withdrawal: | Front |
| Base material: | Stainless steel |
