2-part stainless steel mailbox Designer Model Big - Clean Edition - individually

High quality mailbox of the brand Briefkasten Manufaktur in the extra large format. Suitable for newspapers, magazines and books with a newspaper flap. A real eye-catcher among the mailboxes. Clear lines and straightforward design are characterized by the designer mailbox. Our products have a high value, reliable functionality and their own identity. Made by Briefkasten Manufaktur.

- 2-part stainless steel mailbox made of 2 mm stainless steel V2A 1,4301, ground.
- Fronts side post-withdrawal door 350 mm x 300 mm, to open from top to bottom. Including 2 key with key number per party.
- Settling from the front, dimensions of the insertion: W 35 cm x H 6.3 cm, C4 across. Very large letters fit here without kinking.

Attention no withdrawal protection!

- **from now on with built-in damping elements, which let the throw-in flap slowly and quietly close.**
- optionally interchangeable name tag made of stainless steel with laser lettering or name tag made of plexi.
- optionally with house number in polished optics (67mm high), set off.
- 8-12V DC Kurzhub bell button with LED ring lighting (blue, white, red or green). The lighting of the bell button cannot be supplied by the control unit. It must be connected to an additional power supply 8-12 V DC.
- Optional is an 8-12V DC short-lived light button with pictogram.
- Preparation (installation speaker not included) for intercom.
- Optional with universal adapter for all commercially available installation speakers.
- Optional preparation (not included in the scope of delivery) for a camera.
- Dimensions Built-in- or wall-mounted box: H 1220 mm x W 410 x D 100 | 150 mm. Built-in Kasten with pretzled cable inlets and fastening points on all sides. Wall-assembled box for wall assembly with hole in the back, wall-mounted box for fence mounting without perforation (must be done on site). Attention, even with wall-mounted boxes, the front cover 2 cm is all over again.
- Steel cleaning box, galvanized. wall-mounted box made of stainless steel V2A, all sides grinding without visible screw connection.
- plastering box with pretzled cable inlets on all sides.

camera or voice center preparation

We always recommend the electrical installation to be carried out by an electrical installer.

We offer the preparation of cameras & speakers from different manufacturers for our mailboxes. The preparation does not contain any end devices, which are the provision of the screw recordings, bores and perforations. So that you can easily install your device.

water protection

In order to achieve optimal water protection of your post, the mailbox or the mailbox system should be under a canopy if possible. The post office is only protected from water if it is completely stored in the box and the throw-in flap is closed. Unskinned mail enables the penetration of moisture and dirt into the mailbox. It is therefore necessary to plan sufficiently dimensioned mailboxes for the upcoming need. In certain extreme weather conditions, water can still occur (according to DIN EN 13724 to 1ccm). This is not a reason for complaint.
