Stainless steel house number Hölderlin 450

Choosing the right font is crucial for a house number. Optimal legibility is the first priority. But the house number is also an important design element. On the back side there are two 30mm long welding studs with thread. After drilling the holes and inserting the dowels, you only need to put the numbers/letters on.
Made in Germany, manufactured in Bad Salzuflen

- House number made of stainless steel V2A 1.4301.
- Fastening to the wall is done by welding studs shot from behind, which are simply inserted into the dowel holes.
- Number height 45 cm.
- Material thickness 2 mm.
- Delivery includes dowels (S6).
