Product number 382XU-VA-12-SPS-100-L

Product description

12-unit stainless steel flush-mounted mailbox system BASIC Plus 382XU UP with side bell box - brushed stainless steel

Modern flush-mounted mailbox for 12 units - made in Germany by Briefkasten Manufaktur.

The mailbox is made entirely of stainless steel V2A, brushed. The very high-quality workmanship and the well thought-out concept make this flush-mounted mailbox one of our top sellers. A rain drip edge for optimal water protection, a continuous rubber lip for quiet insertion, the solid changeable nameplate, a practical mail retaining bar and the very robust lock characterise this flush-mounted mailbox. The flush-mounted frame made of stainless steel V2A is fitted with a foam rubber seal and guarantees very high durability.

The mailbox systems of the BASIC Plus collection are characterised by the consistent use of stainless steel V2A. The result is very high durability and sustainability. The construction has been developed by our own engineers with regard to high flexibility and modularity, simple spare part installation and uncomplicated self-assembly. Spare parts are directly available for all BASIC Plus systems.

- The universal adapter is suitable for all common built-in speakers (Siedle, Ritto, TCS, Busch-Jäger, Gira, Legrand Bticino, ELCOM, Auerswald, Comelit, etc.).
- Provision for a camera (camera not included).
- 12x round stainless steel doorbell buttons Type: Grothe Protact, max. 24 V AC/DC, 1.5 A, IP54 (pressure force limitation).
- Changeable nameplate (Type 2), replaceable from the front.
- Plaster cover frame made from stainless steel angle profile 25 x 58 mm, 240 grit brushed.

Camera or intercom preparation

We always recommend that the electrical installation is carried out by a qualified electrician.

We offer preparation for cameras & intercom units from various manufacturers for our mailboxes. The preparation does not include end devices; it consists of providing the screw mounts, drillings & cut-outs so that you can mount your end device without difficulty.

Water protection

To achieve optimum water protection for your mail, the mailbox or mailbox system should, if possible, be located under an overhang.

Mail is only protected from water if it is placed completely inside the box and the mail flap is closed. Mail that is not fully inserted allows moisture and dirt to enter the mailbox. Therefore it is necessary to plan mailboxes of a sufficient size for the expected requirements. Under certain extreme weather conditions water may still enter (according to DIN EN 13724 up to 1 cm^3). This does not constitute grounds for a complaint.
