# 2-compartment Stainless steel surface mailbox BASIC Plus 592C AP with DoorBird D2100E video intercom system

This 2-compartment mailbox system combines the highest quality and modern design. The system is made entirely of stainless steel V2 A 1.4301, ground. The grinding pattern captivates by the charisma of highest elegance. Extremely high quality workmanship and the sophisticated concept make this 2compartment surface mailbox our top seller. A rain drainage edge for optimal water protection, rubber bumpers for quiet insertion and the very robust change name plate distinguish this surface mailbox. Integrated DoorBird IP Video Door Station D2100E. The DoorBird IP Video Door Station D2100E is the smart solution for your front door. The IP Video Door Station can be operated as a standalone unit or integrated into an existing smart home platform. Even existing, classic installations such as a door chime or an electric door and gate opener can continue to be used with DoorBird and controlled via the app.
Thanks to the construction method, self-assembly is uncomplicated.
Our products have a high value, reliable functionality and their own identity. Made by Briefkasten Manufaktur. DoorBird was also not only invented and developed in Germany, but is also produced in Berlin to this day. At DoorBird, "Made in Germany" is not just a seal, but a lived philosophy. The IP video door stations are manufactured in the DoorBird manufactory to guarantee the highest quality, durability and customer satisfaction.

• **Surface-mounted mailbox for 2 parties with mailboxes made of stainless steel V2A 1.4301, ground.**
• The removal doors can be opened from left to right with rain drainage edge for optimum water protection.

• Dimensions intercom & bell unit: W 170 mm x H 660 mm x D 100 mm.
• Optionally with house number, white illuminated.
• Incl. DoorBird IP video door station D2100E with button illuminated installed.

## Important information

**Camera or intercom preparation**

**The intercom systems must be connected by an electrician. Contact your trusted electrician for planning, installation and installation.**

**Water protection**

In order to achieve optimum water protection for your mail, the mailbox or mailbox system should, if possible, be located under a canopy.
Mail is only protected from water when it is completely inserted in the box and the insertion flap is closed. Mail that is not completely inserted allows moisture and dirt to enter the mailbox. Therefore, it is necessary to plan sufficiently sized mailboxes for the upcoming needs. In certain extreme weather conditions, water can still enter (according to DIN EN 13724 up to 1ccm). This is not a reason for complaint.

## Abmessungen & Details

| | |
|---|---|
