Design mailbox free-standing Schiller MEDIUM VARS - RAL color with stainless steel application

High quality stainless steel design letter box for stand assembly with a newspaper box. Front panel made of 2mm stainless steel in RAL fine structure, matt powder-coated & noble stainless steel application. This mailbox is massively manufactured and the basic material is made of stainless steel. This is how optimal rust protection is given. The structure also gives optimal water protection. The door lock side can be selected for left-handed or right-handed people so that one-handed operation is possible.

The dimensions enable a capacity of approx. 14 liters, the throw-in from above is guaranteed also for DIN-C4 envelopes and magazines or, after several days of absence, no crumpled mail. This mailbox free-standing is designed in such a way that you keep your hands freely when opening, and the inner structure prevents the mail from falling towards you. By throwing in from above, the internal post is optimally protected from weather influences. The lid is secured against annoying rattles with rubber cycling.

- High quality stainless steel design mailbox free-standing in RAL color.
- Corpus made of 1.5 mm stainless steel, powder-coated in RAL color structure, matt.
- Front panel 2 mm stainless steel, powder-coated in RAL color structure, matt.
- Available with the door hit on the left (door lock on the right) or door was hit right (door lock on the left).
- High quality door lock on the side including 2 keys with key number.
- Post throw in from above, throw-in size suitable for C4 envelopes.
- Optimal water protection.
- Application made of stainless steel V2A, ground.
- Name label, lasered approx. 10-20mm high.
- House number lettering, lasered approx. 60-80mm high.
- The stand columns consist of 40 mm x 40 mm rectangular tube stainless steel V2A, ground. To screw or concreted.
