## Design mailbox Schiller Small VA7016 - stainless steel V2A, ground & RAL 7016 anthracite gray

High quality stainless steel design letter box for wall mounting with front panel made of 2mm thick stainless steel, ground. The body consists of 1.25mm thick stainless steel completely in RAL 7016 anthracite gray fine structure, matt powder-coated. This is how optimal rust protection is given.

The dimensions enable a capacity of approx. 14 liters, the letting swing 305x35mm (Width x Height) from above guaranteed also with DIN-C4 envelopes and magazines or after several days of absence no crumpled mail. By throwing in from above, the internal post is optimally protected from weather influences. This wall letter box is designed in such a way that you keep your hands freely when opening, and the inner structure prevents the mail from falling towards you. The door lock side can be selected to match left-handers or right-handers so that one-handed operation is possible. The letter-in-case flap is secured with rubber cycling against disturbing rattles.

The total size of the mailbox body is 335x320mm (Height x Width), the front panel dimension is 360x340mm (Height x Width).

For each mailbox system, we deliver 2 keys by default.

The design of your entrance area becomes perfect if you combine the self-adhesive house number made of stainless steel and name tag (not included in the scope of delivery, see accessories).
