6-unit freestanding mailbox system Design BASIC 385P-7016-SP with bell-intercom unit, including side cladding and rain hood - horizontal mailboxes - Anthracite grey RAL 7016 | RAL 7016 Anthracite grey, fine texture, matt | Left | with 6 letterboxes

Product number 385P-7016-6W-SP-L

Product description

Freestanding mailbox system BASIC 385P with bell/intercom unit on the left for 6 households – RAL 7016 Anthracite grey – wide version

The freestanding BASIC 385P mailbox system for 6 households combines 6 separately usable mail compartments with an integrated bell function housing. This brings mail reception, doorbell buttons and the provision for a compatible door intercom system together in a robust, visually cohesive entrance solution for apartment buildings, smaller residential complexes and commercial properties. In this variant, the bell/intercom unit is positioned to the left of the mailbox system.

The mailboxes are made of galvanised steel and are fine-textured matt powder-coated in RAL 7016 Anthracite grey. A close-fitting side cladding with a rain hood and integrated drainage channels support weather protection. The solidly manufactured stand posts of anodised aluminium profile are also powder-coated in RAL 7016 Anthracite grey and provide an especially stable, durable base for the freestanding installation.

Each of the 6 mail compartments has approx. 12 litres of volume. The 35 × 265 mm letter slot is designed for DIN C4 items in portrait orientation. A noise-damping rubber lip reduces the impact of the letter flap. Mail removal is from the front; the access doors open from left to right. Each mailbox is supplied with two keys bearing the key number and an interchangeable nameplate located below the letter flap.

The advantages of the BASIC 385P mailbox system at a glance

Integrated bell function housing on the left

The system combines 6 mailboxes with 6 stainless steel doorbell buttons and a speaker aperture with a universal adapter. This creates a central, tidy solution for mail and visitor communication.

Solid aluminium stand posts

Solidly manufactured anodised aluminium profiles form the stable base of the freestanding system. The powder-coated construction combines high load-bearing capacity with a durable outdoor finish.

DIN C4 letter slot with 12-litre volume

The mailboxes each offer approx. 12 litres of mail volume. The 35 × 265 mm letter slot accepts DIN C4 items in portrait orientation without larger envelopes needing to be unnecessarily folded.

Prepared for door communication

The speaker aperture with universal adapter is prepared for many commercially available flush-mount speakers.

Robust BASIC quality in RAL 7016 Anthracite grey

Galvanised steel, stainless steel components, solid aluminium stand posts and German manufacture result in a resilient mailbox system for long-term use at the property entrance.

Equipment of the BASIC 385P mailbox system

Mailbox system

Number of mailboxes 6 separately usable mail compartments
Mailbox dimensions 300 × 110 × 385 mm (W × H × D) per compartment
Mail volume Approx. 12 litres per mailbox
Material Galvanised steel; side cladding and rain hood made of V2A stainless steel
Finish RAL 7016 Anthracite grey fine-textured matt
Letter slot 35 × 265 mm, suitable for DIN C4 portrait
Standard Mailboxes conforming to DIN EN 13724

Bell and intercom unit

Bell function housing Galvanised steel, powder-coated to match
Position Left
Doorbell buttons 6 round stainless steel doorbell buttons Type 4
Speaker aperture With universal adapter for commercially available flush-mount speakers
Nameplate Designed to be tamper-proof and impact-resistant

Solid aluminium stand posts

Stand posts Solidly manufactured anodised aluminium profile
Coating Powder-coated in RAL 7016 Anthracite grey
Mounting options Either screw mounting or embedding in concrete
Screw mounting Stand posts selectable in 1200 or 1600 mm
Embedding in concrete Stand posts selectable in 1600 or 2000 mm
Delivery condition Stand posts and mailbox system supplied split for assembly
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Note on the bell/intercom unit

The universal adapter is suitable for many commercially available flush-mount speakers. Intercom systems or built-in speakers, power supply and cabling are not part of the described standard equipment and must be provided to suit the planned system.

Mounting on a foundation

For screw mounting, a level and sufficiently load-bearing foundation is required. Fastening materials must be selected to suit the foundation, the system weight and the local site conditions.

Mounting by embedding in concrete

For the embed-in-concrete version, the extended aluminium stand posts are anchored vertically in a suitably dimensioned concrete foundation. Foundation size and embedment depth must be matched to ground conditions, system dimensions and local loads.

Note on weather protection

The rain hood, close-fitting side cladding and drainage channels support weather protection. Mail items must be fully inserted so that the letter flaps can close completely. Under extreme weather conditions, minor moisture ingress may occur despite norm-compliant construction.

Product properties

Material	Steel, galvanised, Aluminium AlMg3 W19, Stainless steel V2A 1.4301
Series	BASIC
Number of bell push buttons	6 buttons
Functions	Light button, Intercom
Functional box prepared for manufacturer	GIRA, Busch Jaeger, Siedle, STR Elektronik, ELCOM, TCS, Ritto, ALGO, Telegärtner, Auerswald, Legrand Bticino, Comelit
Number of boxes	with 6 letterboxes
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Mounting type	Free-standing
Surface/colour	RAL 7016 anthracite grey
Removal of mail	On the front
