Product number 385A-7016-20W

Product description

Wide surface-mounted mailbox system BASIC 385A for 20 households – RAL 7016 Anthracite Grey

The BASIC 385A surface-mounted mailbox system for 20 households is a robust wall solution for larger apartment blocks, residential complexes and commercial properties. The wider W version distributes the mail compartments across a multi-column front and keeps the overall system lower and more manageable in proportion.

The mailboxes are made from galvanised steel and powder-coated in RAL 7016 Anthracite Grey fine texture matt. The close-fitting cladding with rain hood joins the individual compartments into a closed, modern surface-mounted system.

Each compartment measures 300 × 110 × 385 mm (W × H × D) and offers approx. 12 litres of volume. The 35 × 265 mm letter slot is designed for DIN C4 items in portrait format. The doors open from left to right; each mailbox is supplied with two keys with key number and an interchangeable nameplate below the letter flap.

The advantages of the BASIC 385A surface-mounted system at a glance

Rain hood and side cladding

The rain hood and side panels combine the individual compartments into a closed surface-mounted system. The coordinated cladding provides a calm front and a neat finish at the façade.

DIN C4 letter slot and 12 litres volume

The 300 × 110 × 385 mm (W × H × D) compartments each provide approx. 12 litres of volume. The 35 × 265 mm letter slot also accepts larger DIN C4 items in portrait format.

Quiet insertion and secure allocation

The rubber lip damps the letter flap. Robust locks, two keys with key number and protected interchangeable nameplates ensure clear use of the individual compartments.

Mounting rail for wall installation

The surface-mounted system is designed for direct façade mounting. A mounting rail simplifies installation; fixing materials with screws and plugs are included in the described configuration.

Durable surface in RAL 7016

The anthracite grey fine-texture surface gives the system a modern appearance and protects the galvanised steel for daily use on the building. The system is manufactured in Germany at the Briefkasten Manufaktur.
