Datasheet for Stainless steel mailbox designer BIG - GIRA System 106 - intercom -AUDIO complete set

Stainless steel mailbox designer BIG - GIRA System 106 - intercom - AUDIO complete set

High-quality manufactured letterbox of the brand Briefkasten Manufaktur in extra large format. Seamlessly integrated Gira System 106 in flush design. 3 GIRA system modules are included, so the letterbox can be used directly. The system modules can be replaced at a later date as required thanks to the simple retaining system. The matching GIRA home station and the control unit to complete this letterbox are included

This is a real eye-catcher among the letterboxes. Clear lines and no-frills design characterize the designer letterbox with GIRA System 106. Our products have a high value, reliable functionality and their own identity. Made by Briefkasten Manufaktur.

- Designer stainless steel mailbox with front panel made of 2 mm stainless steel V2A, polished.
 Front mail removal door 320 mm x 300 mm, to open from top to bottom. Incl. 2 keys with key number.
- Mail slot from the front, dimensions of slot: W 32 cm x H 6.3 cm, C4 landscape. Very large letters fit in here without bending. Attention no removal protection!
- From now on with built-in damping elements, these let the insertion flap close slowly and quietly.
 Dimensions flush-mounted or surface-mounted box: H 710 mm x W 410 x D 100 | 150 mm. ATTENTION: The front panel of the surface-mounted box also protrudes by 2 cm.
- · Plaster box made of galvanized steel. Surface box made of stainless steel V2A, ground on all sides without visible screw connection.
- Plaster box with pre-punched cable inlets on all sides.
- Name plate made of stainless steel, ground. Your name is optionally lasered onto the nameplate.
- Optionally with house number, lasered.
- Incl. GIRA home station & control unit enclosed, System 106 door station module & info or dummy module installed.

GIRA
Info module Gira System 106 - 5560 920, installed
• For house numbers that are to be prominently displayed.

Door station module Gira System 106 - 5565 920, installed without wiring

- Compact voice module with integrated call button for communication between inside and outside.
 A high-quality microphone and a weatherproof loudspeaker ensure good communication.
- Power supply via 2-wire bus. Additional connection for ZV (e.g. necessary from 3rd camera module).
- All other System 106 modules (except voice module) are supplied with voltage via the door station module.
 Surface-mounted home station Gira 1250XX, enclosed

- Completely pre-assembled surface-mounted home station, thus quick and clean installation.
- · Design diversity through integration in the switch range, thus uniform appearance of door communication and electrical installation.
- Mounting both with and without cover frame.
- Simple installation due to plug-in screw terminals on the mounting plate. Contacting to the home station is made when the home station is plugged onto the mounting plate.
- Simple disassembly of the home station during renovation work.
- · Fixing holes for mounting.
- Signal transmission and supply of the home station via reverse polarity protected and short-circuit proof 2-wire bus.
- Parallel connection of up to three home stations possible (with power supply via 2-wire bus).
- One-man commissioning thanks to simple commissioning procedure.
- Ringing tone differentiation between door call, internal call and storey call.
- Selection of five different ringing tone melodies, which can be individually assigned to individual call buttons.
 Hands-free function (voice-controlled intercom with echo and background noise suppression).
- · Assertion function in case of loud ambient noise during voice communication.
- · Privacy lock.
- Operating buttons with integrated LEDs for status display.

Control device audio REG Gira 128700, enclosed

- Supply of the reverse polarity protected and short-circuit proof 2-wire bus.
- · Self-resetting electronic short-circuit and overload detection of the operating voltages and the bus connection.
- · Buttons for system and door opener programming.
- · LED status indicators for operation, overload, system programming and door strike programming.
- AC 12 V output for powering a standard electric strike.
 Permanent AC 12 V output for supplying power to a TKS-TK gateway.
- · Relay output for switching a door opener with its own power supply.
- · Door opener switching time continuously adjustable from 1 to 10 s.

Important information

Camera or intercom preparation The intercom systems must be connected by an electrician. Contact your local electrician for planning, mounting and installation.

To achieve optimum water protection for your mail, the mailbox or mailbox system should be located under a canopy if possible.

Mail is only protected from water when it is completely inserted in the box and the insertion flap is closed. Mail that is not completely inserted allows moisture and dirt to enter the mailbox. Therefore, it is necessary to plan sufficiently sized mailboxes for the upcoming needs. In certain extreme weather conditions, water can still enter (according to DIN EN 13724 up to 1ccm). This is not a reason for complaint.
