## Stainless steel fence mailbox designer model BIG with Comelit VIDEO complete set Wifi

High-quality manufactured mailbox with rear removal of the brand Briefkasten Manufaktur in extra large format. With a newspaper drop flap suitable for newspapers, magazines and book mail. Integrated Comelit VIDEO complete set Wifi. Comelit video intercom is an innovative solution with features such as facial recognition, Voice commands and operation via app with your smartphone. Completely pre-programmed for easy installation - connect 2 wires and DONE!

A real eye-catcher among mailboxes. Clear lines and sleek design characterize the designer mailbox. Our products have a high value, reliable functionality and their own identity. Made by Briefkasten Manufaktur.

- Designer stainless steel fence mailbox made of 2 mm stainless steel V2A.
- Rear mail removal door 240 mm x 300 mm, to open from top to bottom. Incl. 2 keys with key number.
- Mail slot from the front, dimensions slot: W 35 cm x H 6.3 cm, C4 landscape. Very large letters fit in here without bending. Attention no removal protection!
- With built-in damping elements, these let the insertion flap close slowly and quietly.
- Bell button made of stainless steel with changeable name plate, illuminated.
- Optionally with house number, backlit in white incl. EVN LED power supply / transformer IP65 12V/DC 0.1-4W for the LED lighting of the house number.
- Dimensions surface box: H 710 mm x W 410 x D 100 without mounting holes (must be done on site). ATTENTION: the front panel protrudes by 2 cm.
- Surface box made of stainless steel V2A, ground on all sides.

### Important information

#### Camera or intercom preparation

**The intercom systems must be connected by an electrician. Please contact your local electrician for planning, installation and wiring.**

#### Water protection

To achieve optimum water protection for your mail, the mailbox or mailbox system should be located under a canopy if possible. Mail is only protected from water when it is completely deposited in the box and the insertion flap is closed. Mail that is not completely inserted allows moisture and dirt to enter the mailbox. Therefore, it is necessary to plan sufficiently sized mailboxes for the upcoming needs. In certain extreme weather conditions, water can still enter (according to DIN EN 13724 up to 1ccm). This is not a reason for complaint.
