1200mm for screw mounting

Product number HF1200-60-STR

Product description

High-quality stand element made of V2A stainless steel, polished for screw mounting with base plate. The elegant connecting elements are seamlessly attached so that no screws are visible. The letterbox is attached directly to the stand element via the letterbox. A flat stainless steel pipe end cap closes the upper end of the stand element. The stand element is open at the bottom so that cable routing is possible without any problems. If cable routing is required (only for items with bell/intercom part), a connecting element is welded on so that a cable feed-through (always on the right, 14 mm) is possible.

Length 1200mm
Diameter 60.3 mm
Wall thickness 2 mm
Base plate thickness 6 mm
