21-unit freestanding mailbox system Design BASIC 385 ST-R - RAL 7016 anthracite grey | RAL 7016 Anthracite grey, fine texture, matt | 300x110x385 mm (WxHxD) - ?? Normal 12 litres | with 21 mailboxes

Product number 385-7016-21W

Product description

Freestanding 21-unit mailbox system BASIC 385 for 21 households – wide, multi-column design – RAL 7016 Anthracite grey

The freestanding BASIC 385 mailbox system for 21 households combines a robust construction with a clear, functional design. It is suitable for larger apartment buildings, residential complexes and demanding commercial properties and can be positioned independently of the building façade at the property entrance, by a driveway or along an access path.

The W version distributes the mailboxes in a wider, multi-column layout and creates a clear frontage for multiple users.

The mailboxes are made of galvanised steel and are powder-coated in RAL 7016 Anthracite grey with a matt fine-textured finish. A close-fitting side cladding with a rain hood unifies the individual mailboxes into a closed overall unit.

Each compartment features an insertion opening of 35 × 265 mm for DIN C4 items in portrait format. A noise-dampening rubber lip reduces impact noise, while the front access doors open from left to right. Each mailbox is supplied with two keys showing the key number and a replaceable nameplate located beneath the mail slot.

The advantages of the BASIC 385 at a glance

Massive stainless steel support posts

Round-tube support posts with approx. 60 mm diameter made of brushed stainless steel V2A 1.4301 form a stable base for the freestanding mailbox system. The robust construction is designed for long-term use at the property entrance.

Large insertion opening compliant with DIN EN 13724

The insertion opening of 35 × 265 mm is designed for DIN C4 items in portrait format. Larger envelopes can be deposited without folding.

Quiet insertion and comfortable retrieval

A noise-dampening rubber lip reduces the clatter of the insertion flaps. Mail is retrieved from the front via doors that open from left to right.

Durable surface in RAL 7016

The matt fine-textured surface in Anthracite grey combines a modern appearance with a resilient coating on the galvanised steel.

Proven BASIC quality Made in Germany

The combination of solid material selection, DIN EN 13724-compliant mailbox compartments and an installation-friendly construction makes the BASIC 385 a durable solution for daily use.

Equipment of the BASIC 385 mailbox system

Mailbox system

Design Wide, multi-column design
Number of mailboxes 21 individually usable compartments
Mailbox material Galvanised steel
Surface RAL 7016 Anthracite grey fine-textured matt
Rain hood / side cladding Galvanised steel, powder-coated in RAL 7016 Anthracite grey fine-textured matt
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Mail and operation

Insertion opening 35 × 265 mm, suitable for DIN C4 portrait
Insertion flaps With noise-dampening rubber lip
Mail retrieval From the front
Door opening Opens from left to right
Keys 2 keys with key number per mailbox
Nameplate Replaceable nameplate beneath the insertion flap
Standard Mailboxes conforming to DIN EN 13724

Support posts and accessories

Support posts Round tube approx. 60 mm in stainless steel V2A 1.4301, brushed
Types of installation Optionally for bolt-down installation or for setting in concrete
Fastening Bolt anchors for bolt-down installation are not included; select separately to suit the foundation

Mailbox size and volume

The BASIC 385 is available with different mailbox sizes depending on product configuration. The standard version 300 × 110 × 385 mm offers approx. 12 litres of volume; depending on the variant, 300 × 220 × 385 mm with approx. 25 litres of volume is also available.

Installation by setting in concrete

For the freestanding system we recommend an adequately sized concrete foundation. When setting in concrete, the stainless steel support posts must be aligned plumb and permanently anchored in the foundation. The foundation size and embedment depth must be adjusted to the ground conditions, system weight and local requirements.

Bolt-down installation on a foundation

A level, load-bearing concrete foundation is required for bolt-down installation. Suitable bolt anchors or fastening elements must be selected to match the substrate and system load. For the BASIC-385-ST-R versions, bolt anchors are not included in the standard scope of delivery.

Note on weather protection

Mail is best protected from moisture and soiling only when fully inserted and with the insertion flap closed. Overhanging items may prevent the flap from closing completely. Under extreme weather conditions, moisture can enter the mailbox despite norm-compliant construction.

Product properties

Material	Steel, galvanised, Stainless steel V2A 1.4301
Surface/colour	RAL 9005 deep black, RAL 3004 crimson red, DB 703 iron mica, RAL 7016 anthracite grey, RAL of your choice (according to colour table), Brushed, RAL 9007 grey aluminium, RAL 9016 traffic white
Series	BASIC
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Mounting type	Free-standing
Removal of mail	On the front
Number of boxes	with 21 letterboxes
