## Stainless steel dustbin box BASIC 750V1 - 2-fach - polished stainless steel

High-quality manufactured 2-fach garbage can box with elegant round tube stand elements completely made of stainless steel V2A 1.4301, polished. This garbage can box convinces by an extremely long life span, equipment elements from the upper class as well as a short delivery time. If an elegant solution is sought to accommodate garbage cans near a property, then this stainless steel garbage can box is the answer. Whether in the garden, driveway or yard, unattractive trash cans disappear in a trash can enclosure. The cladding sheets decorated with cutouts hide the waste garbage cans placed behind them and still allow a view. Due to the clever surface design, the actual purpose of the trash can box is not seen. When using other architectural elements (fence, mailbox, house number) of the Mailbox Manufaktur, the trash box blends harmoniously into the overall architecture.

Thanks to standard door handle comfortable access to each garbage can is guaranteed. At the same time, each door handle can be equipped with your own cylinder lock (door locking system). The height of the garbage can box is dimensioned in such a way that a garbage bag can easily be thrown in without having to move the garbage can out of the garbage can box. The trash can enclosure is suitable for all standard household trash can sizes (120-240 liters).

Also the variety of the garbage can box is very large. There is the garbage can box as a single, double or triple cabinet (the interlinking is unlimited), while the cladding sheets and door can be powder-coated optionally in a RAL color. The design for different sizes of the garbage enclosure, depending on the container needs, makes the boxes attractive also for apartment buildings.

- 2-fach Dustbin box made of stainless steel V2A 1.4301, 240 grain ground.
- The garbage can box is handmade at Briefkasten Manufaktur. German quality production "Made in Germany".
