6-compartment Stainless steel free-standing letterbox - mailbox system BASIC 810Q incl. bell + nameplates

This 6-compartment mailbox system combines the highest quality and modern design. High-quality workmanship, the sophisticated concept, a rain drain edge for optimal water protection, rubber bumpers for quiet insertion and the very robust interchangeable name plate distinguish this free-standing letterbox.

The elegant rectangular columns are made of solid 2 mm stainless steel V2A 1.4301, ground and equipped with a 10mm thick base plate for screw mounting.

Thanks to the construction method, self-assembly is uncomplicated.

The letterbox system is created by the letterbox manufactory. 100% Made in Germany, Bad Salzuflen.

• free-standing letterbox system for 6 parties with letterboxes made of stainless steel V2A 1.4301, grinded

- The removal doors can be opened from left to right with rain drain edge for optimal water protection.
- Insertion flap with noise-damping rubber buffers for very quiet insertion of mail.
- With changeable name plate and 2 keys per individual mailbox.
- The mailboxes comply with DIN EN 13724. Insertion size (3.5 cm x 32.5 cm) for DIN C4 landscape, large letters also fit in here without bending.
- The columns are made of W 20 mm x D 100 mm stainless steel V2A 1.4301, ground for screw mounting.
- **Bell intercom unit for 6 rental parties Stainless steel V2A 1.4301, polished**
- Dimensions intercom & bell unit: W 150 mm x H 640 mm x D 110 mm.
- 6x bell push buttons, round stainless steel, max. 24 V AC/DC, 1.5 A, IP 54.
- The inscriptions of the nameplates can be exchanged as desired.
- With universal adapter for all commercially available built-in loudspeakers.
- Invisible cable feed through the stand elements possible.

Important information

Camera or microphone unit preparation

We recommend that the electrical installation is always carried out by an electrical installer.

We offer preparation of cameras & intercoms from various manufacturers for our mailboxes. The preparation does not include terminal equipment, it is the provision of the screw mounts, holes & perforations. So that you can mount your terminal device without any problems.

Water protection

In order to achieve optimal water protection for your mail, the mailbox or mailbox system should, if possible, be located under a canopy.

Mail is only protected from water when it is completely inserted in the box and the insertion flap is closed. Mail that is not completely inserted allows moisture and dirt to enter the mailbox. Therefore, it is necessary to plan sufficiently sized mailboxes for the upcoming needs. In certain extreme weather conditions, water can still enter (according to DIN EN 13724 up to 1ccm). This is not a reason for complaint.

Abmessungen & Details

Number of parties:	6
Item withdrawal:	Front
Height single box in cm:	32,0
Width single box in cm:	37,0
Volume single box in liters:	12,0
