Stainless steel wall pass-through mailbox DESIGNER Style - polished stainless steel

High-quality manufactured pass-through mailbox of the brand Briefkasten Manufaktur. Due to the variable shaft length between 270mm to 400mm, this mailbox can be used in pretty much all masonry. The mail removal takes place on the back. The front and rear stainless steel plates made of 2mm stainless steel V2A, ground can be mounted invisibly on the wall thanks to the screw connection inside the shaft. There are no fastening screws to be seen.

A real eye-catcher among the mailboxes. Clear lines and no-frills design characterize the designer mailbox. Our products have a high value, reliable functionality and their own identity. Made by Briefkasten Manufaktur.

Water protection

In order to achieve optimum water protection for your mail, the letterbox or letterbox system should, if possible, be located under a canopy.

Mail is only protected from water when it is completely inserted in the box and the insertion flap is closed. Mail that is not completely inserted allows moisture and dirt to enter the mailbox. Therefore, it is necessary to plan sufficiently sized mailboxes for the upcoming needs. In certain extreme weather conditions, water can still enter (according to DIN EN 13724 up to 1ccm). This is not a reason for complaint.
