Stainless steel mailbox package column Designer BIG - RAL at choice - GIRA System 106 - 3-compartment prepared

Modern stainless steel column made of 2 mm stainless steel V2A 1.4301, powder coated in RAL color of your choice. The column is fully welded, so no rivets or screws are visible. The letterbox module and the parcel box module are also inserted into the pillar with invisible screws. The letterbox and parcel box modules are also made of 2mm stainless steel V2A 1.4301, powder-coated in RAL color and can be replaced with new modules even after many years. The Gira System 106 can be used seamlessly in a flush design. The preparation is intended for 3 pieces GIRA 106 system modules. The modules can be used flush with the surface thanks to the simple holding system (surface-mounted housing 5503910 required!). This mailbox pedestal with parcel box is manufactured at Briefkasten Manufaktur. Made in Germany, Bad Salzuffen.

Parcel reception independent of the delivery person! Every parcel deliverer (e.g. DHL, UPS, DPD, TNT, GLS, Hermes, etc.) can use this parcel box.

- **Mailbox module made of 2mm stainless steel V2A 1.4301, powder coated in RAL of your choice**
- Front mail removal door 350 mm x 300 mm, to open from top to bottom. Incl. 2 keys with key number.
- Mail slot from front, dimensions of slot: W 35 cm x H 6.3 cm, C4 landscape. Very large letters fit in here without bending. Attention no removal protection!
- Insertion flap with built-in damping elements, these let the insertion flap close slowly and quietly.
- **Parcel box module made of 2mm stainless steel V2A 1.4301, powder coated in RAL of your choice**
- Volume parcel box: 130 liters, Max. Parcel size: 540 x 690 x 340 mm (WHT). Ideal for large parcels, suitable for one-time use until the next emptying.
- Front mail removal door 510 mm x 660 mm, to open from left to right. Incl. 5 keys with key number.
- The parcel removal door is equipped with high quality stainless steel hinges for extremely long durability.
- Innovative package lock with snap-in latch.
- High quality stainless steel laser inscription "PAKET".
- The letterbox and parcel box modules of this pillar can also be replaced later, so you always remain flexible.
- **The fully welded column is made of 2 mm stainless steel V2A 1.4301, powder coated in RAL color**
- Overall height is 1.70 m.
- Invisible cable feed through the body is possible.
- The pillar is equipped with a base plate made of VA. This is 10 mm thick and is finished with a cover plate. This way the fixing dowels are concealed.

• **WITHOUT GIRA system components!**

Important information

Camera or intercom preparation

The intercom systems must be connected by an electrician. Contact your trusted electrician for planning, mounting and installation.

Water protection

To achieve optimum water protection for your mail, the mailbox or mailbox system should be located under a canopy if possible. Mail is only protected from water when it is completely inserted in the box and the insertion flap is closed. Mail that is not completely inserted allows moisture and dirt to enter the mailbox. Therefore, it is necessary to plan sufficiently sized mailboxes for the upcoming needs. In certain extreme weather conditions, water can still enter (according to DIN EN 13724 up to 1ccm). This is not a reason for complaint.

Abmessungen & Details

Number of parties:	1
Item withdrawal:	Front
