COMELIT intercom set 1 subscriber with door station 6751W + audio speaker 1621 + 2-wire power supply 1210

The intercom sets from COMELIT are simply connected with the 2-wire technology. This means that the existing lines can be used and there are no additional costs for laying new lines and plastering or painting work. From the new power supply unit in the meter cabinet, simply lay 2 wires to the built-in loudspeaker in the function box of the letterbox system, as well as 2 wires from the power supply unit to the door station in the apartment. DONE.

This set cannot be extended (e.g. with video home station)

- ++ ideal for conversion and renovation, as existing bell lines can be used
- ++ no additional effort for plastering and painting
- ++ low costs due to simple installation
- ++ simple commissioning

Door station 6751W

Mini Audio Handsfree is available in the surface-mount version and has numerous functions such as a door release button, adjustment of the ringing tone volume and ringing tone silencing with red LED display when the function is active. Mini Audio Handsfree can optionally be used to switch relays connected to the system or for internal communication. Dimensions: 140 mm x 140 mm x 20 mm (WHT)
