Security free-standing letterbox Type 174B - Extra volume - Stainless steel polished - Removal from the rear side

Extra large security mailbox. Ideal for cities and municipalities for postal voting, but also car dealerships, banks or tax consultants benefit from the increased security standard.

- The free-standing letterbox TYPE 174B with increased security standard is made of stainless steel V2A 1.4301, ground.
- Very high quality workmanship! Made In Germany.
- The material thickness of the mailbox column is 5mm / 2mm.
- The rear removal doors can be opened from left to right.
- Mail up to B4, with toothed plate as well as steel pins against unauthorized removal. Opening width adjustable.
- The mailbox is equipped with an ABUS profile half cylinder 30/10. This allows you to easily replace the lock with another profile half cylinder of your choice (e.g. a locking system) if necessary.
- Optionally with a fold-out insertion shaft (lock insertion) for items up to B4 (width 25.5 cm, length 36 cm, height 4.3 cm). When the slot is opened, a solid steel plate on the underside closes the slot so that unauthorized access to the mailbox is not possible. Mail dropped in does not fall into the lower part of the mailbox until the chute is closed again. With lock insertion, this mailbox can be used universally, from thin bank transfers to the weekend edition of the FAZ, as well as for objects such as keys up to a thickness of 35mm.
- Optional with lettering/logo. Please request inscriptions and logos separately from us or let us know in the ordering process.

Please note! The letterbox weighs 65 kg.

Important information:

Mail is only protected from moisture and dirt when fully inserted and the flap is closed. In certain extreme weather conditions, water can still enter (according to DIN EN 13724 up to 1ccm). This is not a reason for complaint.
