STECKDOSEN-FUNKGONG

Radio gong Europlug 230 V language DE white CALIMA + radio transmitter UP - for mechanical buttons

With the CALIMA radio chime Europlug + radio transmitter, classic wired bell systems are modernized to a radio bell system without having to change the bell button on the front door. Suitable for many of our bells and mailboxes. This set is suitable for 1 bell button (per receiver up to 11 buttons/radio transmitters UP possible). For each additional party, use another set.

Decently placed in a socket, CALIMA 400 announces your visit anywhere in the house. And illuminates your way at night with the integrated night light. The radio chime can be placed anywhere in the house in a socket. Thanks to the high range CALIMA 400 reliably announces your visitors or suppliers even at a greater distance from the radio transmitter.

• **Socket radio gong 230 V type: GROTHE Calima 400E series**

- Radio gong for plugging into sockets

• **Optical LED signal**

- LED ring with color selection for optical signaling and night light function.

• **Adjustable night light function**

- Night light in desired color.

• **Menu guidance with voice prompt**

- Each menu step is played back to you as a voice announcement.

The assembly

1. Install MISTRAL radio transmitter in a flush-mounted box or the function box behind the existing bell push
2. Pair MISTRAL radio transmitter with the radio chime receiver
3. By pressing the existing bell button, the radio transmitter sends a signal to the radio chime receiver.

Notes

- Walls, doors, metal parts, etc. can noticeably reduce the range!
