spielt per BLUETOOTH® das Lieblingslied

Radio gong Bluetooth microSD battery voice DE white CALIMA + radio transmitter UP - for mechanical buttons

With the CALIMA radio gong Bluetooth microSD battery + radio transmitter, classic wired bell systems are modernized to a radio bell system without having to change the bell button on the front door. Suitable for many of our bells and mailboxes. This set is suitable for 1 bell button (per receiver up to 11 buttons/radio transmitters UP possible). For each additional party, use another set.

You want to hear a specific melody when the doorbell rings? With a microSD card MP3- files can be set on the CALIMA 800 as a chime melody*. This way CALIMA 800 announces your visit with your favorite song. Coupled to your smartphone via BLUETOOTH®, the CALIMA 800 radio gong becomes a portable speaker that plays your music anywhere in the house. As soon as the doorbell rings, the music is interrupted and the doorbell tone is played. Afterwards, the music continues to play. Thanks to its long range, CALIMA 800 reliably announces your visitors or suppliers even if you are far away from the radio transmitter.

• **Socket radio gong 230 V type: GROTHE Calima 800E series**

- Radio gong with lithium battery and charging station with plug-in connector
- Dimensions receiver: Ø90 x 140 mm

• **Menu guidance with voice prompt**

- All menu settings for the CALIMA 800 are made using two buttons. With the acoustic announcement you always know in which menu item you are.

• **Optical LED signal**

- LED ring with color selection for visual signaling.

The assembly

1. Install MISTRAL radio transmitter in a flush-mounted box or the function box behind the existing bell push
2. Pair MISTRAL radio transmitter with the radio chime receiver
3. By pressing the existing bell button, the radio transmitter sends a signal to the radio chime receiver.

Notes

- Walls, doors, metal parts, etc. can noticeably reduce the range!
- *microSD card not included
