Phoenix Contact Mode 3 charging cable type 2 / type 2- length 5m

Safe and fast: With the Phoenix Contact Mode 3 charging cable type 2 / type 2, you can charge your electric car with up to 22 kilowatts- at your own wall box or on the go at a public power filling station. The type 2 connection has now established itself in most e-vehicle models that are sold in Germany.

The two types of type stand for the plugs of the EcAbles. The type 2 connector belongs in the charging station or box, the other type 2 connector must fit to connect your electric car. The three-phase plug is EU standard and has a maximum charging output of 22 kilowatts.

- Compatible throughout Europe with charging points with type 2 socket
- full flexibility with 5 meters of cable length
- manufactured in Germany
