Stainless steel bell pillar designer EDGE - RAL at choice - DoorBird video intercom system

High-quality manufactured bell pillar of the brand Briefkasten Manufaktur with frontal door communication and lateral inscription, illuminated. Clear line, no-frills design and high-quality materials characterize the 2mm stainless steel bell pillar of the DESIGNER collection. The bell pillar is welded by hand, so that no screw connections, hairline joints or gaps are visible in the area of the body. The rear revision door allows easy installation, as well as subsequent work for example repairs or for regular inspection, without any problems. Equipped with a high-quality lock, the inspection door is protected against vandalism. Integrated DoorBird IP video door station D2100E or D1100E. The DoorBird IP Video Door Station D2100E or D1100E is the smart solution for your entrance door. The IP Video Door Station can be operated as a stand-alone unit or integrated into an existing smart home platform. Even existing, classic installations such as a door chime or an electric door and gate opener can continue to be used with DoorBird and controlled via the app.

A real eye-catcher among the doorbell columns, this system cuts a fine figure everywhere. Clear line and no-frills design characterize the designer bell pillars. Our products have a high value, reliable functionality and their own identity. Also the DoorBird was not only invented and developed in Germany, but is also produced in Berlin until today. At DoorBird, "Made in Germany" is not just a seal, but a lived philosophy. The IP video door stations are manufactured in the DoorBird factory to guarantee the highest quality, durability and customer satisfaction.

Influenced by the idea of sustainability, this column was developed with an exchangeable panel. All components can be replaced at any time, whether a new video intercom system, a new house number or a change of lettering, all components can be easily exchanged.

- Bell pedestal with frontal door communication and side lettering, illuminated made of 2mm stainless steel V2A 1.4301, powder coated in RAL color.
- Quality production - Made in Germany - Letterbox Manufaktur Lippe.
- Rear inspection flap W 250 mm x H 700 mm incl. 2 keys.
- House number and name or street inscription, backlit in white incl. EVN LED power supply / transformer IP65 12V/DC 0.1-4W for LED lighting.
- We will map house numbers over 2 digits below each other, otherwise the height is not sufficient.
- The fully welded doorbell stele is made of 2mm stainless steel V2A 1.4301, powder coated. Construction height is 1,80 m | 1,60 m | 1,30 m.
- The pillar is equipped with a base plate made of VA. This is 10 mm thick and is finished with a cover plate. See pictures.
- Invisible cable feed through the body is possible.
- Incl. DoorBird IP video door station D2100E or D1100E installed.

[Now also available individually in the 3D configurator! Configure individual doorbell pillars and doorbell columns and test them via AR directly in front of the front door.](#)

Important information

Camera or intercom preparation

Intercom systems must be connected by an electrician. Contact your trusted electrician for planning, installation and setup.

Water protection

For optimum water protection, the bell system should be located under a canopy if possible.
