Stainless steel parcel stele with letter box Designer BIG - DIN A3 Format - RAL of your choice

Modern stainless steel column made of 2 mm stainless steel V2A 1,4301, powder-coated in RAL color of your choice. The column is fully welded, which means that no rivets or screws are visible. The mailbox module and the parcel module are also inserted into the stele with invisible screw connection. The mailbox and parcel modules are also made of 2mm stainless steel V2A 1,4301, powder-coated in RAL color and can still be exchanged for new modules after many years. High-quality manufactured letterbox column of the brand Briefkasten Manufaktur. Made in Germany, Bad Salzungen.

Delivery-independent package reception! Each parcel deliverer (e.g. DHL, UPS, DPD, TNT, GLS, Hermes, or similar) can use this parcel box.

- **mailbox module made of 2mm stainless steel V2A 1,4301, powder-coated in Ral after election**

- 42 liters of volume for a very large capacity.
- no visible screw or rivet.
- Fronts side post-withdrawal door 510 mm x 660 mm, to open from top to bottom. Including 2 key with key number.
- Settling from the front, dimensions of the throw: W 510 mm x H 63 mm, A3 transverse. There are very large letters, magazines and catalogs without kinking.
- Optional name lettering, lasered approx. 10-40mm dial height depending on the number of signs. Horizontal lettering can also be possible on request.
- Optional house number label, lasered approx. 80-100mm dial.

- **Package box module made of 2mm stainless steel V2A 1,4301, powder-coated in RAL of election**

- Volume package-part: 130 liters, max. Package size: 540 x 690 x 340 mm (WHD). Ideal for large packages, suitable for one-time occupancy up to the next emptying.
- Fronts side post-withdrawal door 510 mm x 660 mm, to open from left to right. Including 5 key with key number.
- The parcel with high-quality stainless steel hinges is equipped for extremely long durability.
- Innovative packet lock with snap lock.
- High-quality stainless steel laser lettering "Package".
- The mailbox and parcel box modules of this stele can be exchanged later, so they always remain flexible.
- **The fully welded stand column consists of 2 mm stainless steel V2A 1.4301, powder-coated in RAL color**
- height is 1.70 m.
- Invisible cable supply possible by the corpus.
- The stele is equipped with a fus plate made of VA. This is 10 mm thick and is refined with a cover panel. This is how the fastening dowels are covered.

important information

water protection

In order to achieve optimal water protection of your post, the mailbox or the mailbox system should be under a canopy if possible. The post office is only protected from water if it is completely stored in the box and the throw-in flap is closed. Unskinned mail enables the penetration of moisture and dirt into the mailbox. It is therefore necessary to plan sufficiently dimensioned mailboxes for the upcoming need. This system is protected against the penetration of water according to DIN EN 13724. Water entry is not a reason for complaint.
