Stainless steel mailbox Designer Model - Clean Edition - RAL of your choice - individually

High-quality manufactured letterbox of the brand Briefkasten Manufaktur. A real eye-catcher among the letterboxes. Clear lines and sleek design characterise the designer letterbox. Our products have a high quality, reliable functionality and their own identity. Made by Briefkasten Manufaktur.
• Designer stainless steel flush-mounted letterbox made of 2 mm stainless steel V2A 1.4301, front panel powder-coated in RAL of your choice. Optionally also as surface-mounted variant.
• Front-side mail removal opening 240 mm x 300 mm, to be opened from top to bottom. Incl. 2 keys with key number.
• Post insertion from the front, insertion size suitable for C4 high.
• **From now on with built-in damping elements, these allow the insertion flap to close slowly and quietly**
.
• Optional exchangeable name plate made of stainless steel with laser inscription or illuminated name plate.
• Optional house number in polished optic (67mm high), offset mounted.
• 8-12V DC short-stroke bell push button with LED ring lighting (blue, white, red or green). The illumination of the bell push button cannot be supplied via the control unit. It must be connected to an additional 8-12 V DC power supply.
• Optional 8-12V DC short-stroke light switch with pictogram is possible.
• Preparation (built-in speaker not included) for intercom possible.
• Optional with universal adapter for all commercially available built-in speakers.
• Optional preparation (camera not included) for a camera.
• Size of flush-mounted or surface-mounted box: H 710 mm x W 310 x D 100 | 150 mm. Flush-mounted box with pre-punched cable inlets and fixing points on all sides. Surface-mounted box for wall mounting with perforation on the back, surface-mounted box for fence mounting without perforation (must be provided by customer). ATTENTION: The front panel of the surface-mounted box also protrudes by 2 cm.
• Plaster box made of steel, galvanised. Surface-mounted box made of stainless steel V2A, ground on all sides without visible screw connection.
• Plaster box with pre-punched cable inlets on all sides.

Camera or intercom preparation
We recommend that the electrical installation is always carried out by an electrician
We offer the preparation of cameras & microphone units from various manufacturers for our letterboxes. The preparation does not include any end devices, it is the provision of the screw mounts, holes & perforations. So that you can mount your end unit without any problems.

Water protection
For optimum water protection of your mail, the letterbox or letterbox system should, if possible, be located under a canopy.
The mail is only protected from water when it is completely deposited in the box and the access flap is closed. Mail that is not fully inserted allows moisture and dirt to penetrate the letterbox. It is therefore necessary to plan sufficiently dimensioned letterboxes for the upcoming demand. In certain extreme weather conditions, water may nevertheless enter (according to DIN EN 13724 up to 1ccm). This is not a reason for complaint.
