## Stainless Steel Letter Box Designer Model SMALL - Clean Edition - INDIVIDUAL

High quality luxury letter box of the brand Briefkasten Manufaktur. A real eye-catcher among the mailboxes. Clear lines and straightforward design are characterized by the designer mailbox. Our products have a high value, reliable functionality and their own identity. Made by mailbox manufactory.

- Designer stainless steel plastering box made of 2 mm stainless steel V2A 1.4301, sanded. Optionally also as a wall-mounted variant.
- Fronts side post-withdrawal door 240 mm x 300 mm, to open from top to bottom. Including 2 key with key number.
- Settling from the front, dimensions of the insertion: W 24 cm x H 3.5 cm, C4 high.
- **from now on with built-in damping elements, which let the throw-in flap slowly and quietly close.**
- optionally interchangeable name tag made of stainless steel with laser lettering or name tag made of plexi.
- 8-12V DC Kurzhub bell button with LED ring lighting (blue, white, red or green). The lighting of the bell button cannot be supplied by the control unit. It must be connected to an additional power supply, this is not included.
- Preparation (installation speaker not included) for intercom.
- Optional with universal adapter for all commercially available installation speakers.
- Dimensions Built-in Box or wall-mounted box: H 560 mm x W 310 x D 100 mm. Built-in Kasten with pretzled cable inlets on all sides. Attention, even with wall-mounted boxes, the front cover 2 cm is all over again.

### camera or voice center preparation

**We always recommend the electrical installation to be carried out by an electrical installer.**

We offer the preparation of cameras & speakers from different manufacturers for our mailboxes. The preparation does not contain any end devices, which are the provision of the screw recordings, bores and perforations. So that you can easily install your device.

### water protection

In order to achieve optimal water protection of your post, the mailbox or the mailbox system should be under a canopy if possible. The post office is only protected from water if it is completely stored in the box and the throw-in flap is closed. Unskinned mail enables the penetration of moisture and dirt into the mailbox. It is therefore necessary to plan sufficiently dimensioned mailboxes for the upcoming need. In certain extreme weather conditions, water can still occur (according to DIN EN 13724 to 1ccm). This is not a reason for complaint.

## Abmessungen & Details

|                              |  |
|------------------------------|--|
| Number of parties:           | 1  |
| Item withdrawal:             | Front  |
