Design flush-mounted door station GOETHE UP with GIRA System 106 - VIDEO Complete kit - RAL at choice

High-quality manufactured door station with a seamlessly integrated Gira System 106 in a flush-mounted design. The matching GIRA home station and the control unit to complete this door station are included. The modules can be replaced at a later date as required thanks to the simple retaining system. The letterbox systems of the GOETHE collection are characterized by the consistent use of stainless steel. The result is a very high durability and sustainability. The design has been developed by our own engineers with a view to high flexibility or modularity, simple spare parts assembly and uncomplicated self-assembly. Spare parts for all GOETHE systems are directly available in our store.

Thanks to the design, self-assembly is uncomplicated.

Protected utility model according to DPMA file number DE: 20 2021 101 679.5

- Flush-mounted door station completely made of stainless steel.
- Quality production - Made in Germany by Briefkasten Manufaktur Lippe.
- Functional box (BH 200x400mm) made of stainless steel 1.4016 (non-rusting magnetic stainless steel), powder coated in RAL of your choice.
- Cover can be opened from top to bottom.
- Name plate/bell button made of stainless steel, powder coated in RAL color. Your name and/or a bell are optionally lasered on the nameplate.
- Optionally with house number, lasered (a name inscription can also be deposited here).
- Plaster cover frame made of stainless steel angle profile 25 x 58 mm, powder-coated in RAL color.
- Incl. GIRA home station & control unit enclosed, System 106 door station module, info module & camera module installed.

GIRA

Camera module Gira System 106 - 5561 000, installed without wiring

A high-quality camera with high light sensitivity is concealed behind the replaceable black glass pane. Thanks to a detection angle of 100°, the user is always in the picture about what is happening outside his front door.

Info module Gira System 106 - 5560 920, installed

- For house numbers that need to be clearly visible.

Door station module Gira System 106 - 5565 920, installed without wiring

- Compact voice module with integrated call button for communication between inside and outside.
- A high-quality microphone and a weatherproof loudspeaker ensure good communication.
- Power supply via 2-wire bus. Additional connection for ZV (e.g. necessary from 3rd camera module).
- All other System 106 modules (except voice module) are supplied with voltage via the door station module.

Home station Gira video surface-mounted 7 1209xx, enclosed

Video home station with a 17.78 cm (7") TFT color display and convenient hands-free function for surface mounting or wall mounting with flush-mounted device box or cavity wall box. With the optional stand (see accessories) also suitable for placement on furniture. A 32 GB SD memory card is included for internal image storage. Full-surface glass front with touch functionality and tactile feedback.

Control device video REG Gira 128800, enclosed

- Control device for supplying the audio and video components of the Gira door communication bus.
- Supply of the reverse polarity protected and short-circuit proof 2-wire bus when using video components such as color camera, TFT color display.
- Up to 2 door stations with color camera and 28 home stations with TFT color display can be supplied via the video control device.
- A total of up to 15 color cameras can be controlled by the video control device (5 door stations video and 10 TKS camera gateways), of which two door stations with color camera can be supplied with voltage by the video control device. The other color cameras must each be operated with their own power supply for door communication.
- Self-resetting electronic short-circuit and overload detection of the operating voltages and the bus connection.
- Buttons for system and door opener programming.
- LED status indicators for operation, overload, system programming and door strike programming.
- AC 12 V output for powering a standard electric strike.
- Relay output for switching a door opener with its own power supply.
- Door opener switching time continuously adjustable from 1 to 10 s.

Important information

Camera or intercom preparation

The intercom systems must be connected by an electrician. Please contact your local electrician for planning, installation and wiring.

Water protection

In order to achieve optimum water protection for your mail, the mailbox or mailbox system should, if possible, be located under a canopy.

Mail is only protected from water when it is completely inserted in the box and the insertion flap is closed. Mail that is not completely inserted allows moisture and dirt to enter the mailbox. This system is protected against water ingress in accordance with DIN EN 13724. Water ingress is not a reason for complaint.

Abmessungen & Details

Number of parties:	1
Base material:	Stainless steel
Connection technology:	2-wire bus technology
Number of bell buttons:	1
Height in cm:	Außenmaß 45,0 Einbaumaß 40,3
Width in cm:	Außenmaß 25,0 Einbaumaß 20,3
Overall height in cm:	recommended 150.0 - 170.0
Depth in cm:	10.0 installation dimension 9.85
Weight in kg:	5,0
Delivery condition:	Delivery is assembled
Shipping information:	Depending on the order volume, delivery is made by parcel shipment or bulky goods shipment. Partial deliveries are possible for products that can be disassembled (e.g., for floor-standing mailboxes, the stand & box can be shipped separately).
