## Safety free-standing letterbox with sluice technology type 170 - stainless steel polished

Very high quality workmanship! Made In Germany.

- The free-standing letterbox with lock technology TYPE 170 with increased security standard made of high quality V2A.
- The material thickness of the letterbox is 5mm / 2mm
- The removal doors can be opened from left to right.
- The mailbox has a fold-out slot **for items up to B4 (width 25.5 cm, length 36 cm, height 4.3 cm)**. When the slot is opened, a solid steel plate on the underside closes the slot so that unauthorized access to the mailbox is not possible. Mail dropped in does not fall into the lower part of the mailbox until the slot is closed again. Type 170 can be used universally, from a thin bank transfer to the weekend edition of the FAZ, as well as for items such as keys up to 35mm thick.
- The mailbox is equipped with an ABUS profile half cylinder 30/10. This allows you to easily replace the lock with another profile half cylinder of your choice (e.g. a locking system) if required.

• **Please note! The letterbox weighs 47 KG.**

### Important information:

The mail is only protected from moisture and dirt when fully inserted and the flap is closed. In certain extreme weather conditions, water can still enter (according to DIN EN 13724 up to 1ccm). This is not a reason for complaint.

### Abmessungen & Details
