## Stainless steel design mailbox DESIGNER Style BIG

High quality update or Built-in mailbox of the brand Briefkasten Manufaktur. A real eye-catcher among the mailboxes. Clear lines and straightforward design are characterized by the designer Style Big. This mailbox is ideal for demanding housing situations in the flush design. With a lot of volume (up to 31 liters) for very large amounts of posts and an extra large throw-in flap for the newspaper throw. Our products have a high value, reliable functionality and their own identity. Made by Briefkasten Manufaktur.

- Designer stainless steel wall-mounted- or plastered letter box made of 2 mm stainless steel V2A, 240 grain.
- 21 liters of volume, up to 31 liters of capacity due to optional mailbox depth.
- No visible screw or rivet.
- Fronts side post-withdrawal door 350 mm x 300 mm, to open from top to bottom. Including 2 key with key number.
- Settling from the front, dimensions of the insertion: W 35 cm x H 6.3 cm, C4 across. Here, very large letters and newspapers fit in without kinking.
- With built-in damping elements, which let the throw-in flap slowly and quietly close.
- Dimensions Fronts side post-withdrawal door: W 35 cm x H 30 cm.
- Dimensions Front panel: W 45 cm x H 55 cm x D 0.2 cm. Attention, even with wall-mounted boxes, the front cover 2 cm is all over again.
- Measurement rear: W 41 cm x H 51 cm x D 10 cm / 15 cm.
- Optional name lettering, lasered approx. 10mm high.
- Steel cleaning box, galvanized. wall-mounted box made of stainless steel V2A, all sides grinding without visible screw connection.
- Plastering box with pretzled cable inlets on all sides.
- Optional house number label, lasered approx. 100mm high.
- Water protection sheet inner.
- Incl. Care cloths and assembly aids.

### Important information

#### Water protection

In order to achieve optimal water protection of your post, the mailbox or the mailbox system should be under a canopy if possible. The post office is only protected from water if it is completely stored in the box and the throw-in flap is closed. Unskinned mail enables the penetration of moisture and dirt into the mailbox. It is therefore necessary to plan sufficiently dimensioned mailboxes for the upcoming need. This system is protected against the penetration of water according to DIN EN 13724. Water entry is not a reason for complaint.
