Digital lock BASIC (opening via app)

Product number BMLZB-SLO-887-15

Product description

Digital retrofit mailbox lock for the BASIC collection

The digital mailbox lock for the BASIC collection combines modern access technology with convenient operation. Open your mailbox keylessly via the free app for iOS and Android. The connection between smartphone and lock is established via Bluetooth Low Energy.

Encrypted Bluetooth communication enables secure and reliable operation. A permanent internet connection at the mailbox is not required. The unique QR code is used for the initial setup of the lock, as well as when changing devices or assigning additional access permissions.

The lock has been specially developed for retrofitting existing mailboxes. It is suitable for mailbox doors with a standard 19 mm hole and can be installed without electrical wiring.

Power is supplied by a replaceable CR2 lithium battery. Depending on usage and environmental conditions, battery life of up to four years is possible. A low battery level is indicated in the app in good time.

Your benefits at a glance

- **Keyless operation via app** – convenient on iOS and Android smartphones
- **Bluetooth Low Energy** – energy-efficient and reliable connection
- **AES-128 encryption** – for secure communication
- **Unique QR code** – for setup and management of access permissions
- **Easy retrofit** – for mailbox doors with a standard 19 mm hole
- **Wireless operation** – no power supply required at the mailbox
- **Up to four years battery life** – depending on usage and environmental conditions
- **Protection rating IP54** – protected against dust and splashing water
- **No mechanical key management** – practical for residential buildings, offices and holiday properties

Contents of delivery

- 1× digital mailbox lock
- 1× CR2 lithium battery
- 1× unique QR code for setup
- Mounting hardware
- User manual

Compatibility

The digital mailbox lock is suitable for selected mailboxes from the collections **BASIC, STORM** and **KLEIST**. For retrofitting, a suitable lock opening or a standard 19 mm hole must be present.

Compatibility with other mailbox models should be checked before ordering.

Areas of application

- Single-family homes
- Apartment buildings and residential complexes
- Office buildings and commercial units
- Holiday apartments and rental properties
- Care, caretaker and service facilities
- Mailboxes and suitable parcel boxes

Made in Germany

The digital mailbox lock is developed and manufactured in Germany. Weather-resistant materials, encrypted communication and the replaceable battery support reliable and long-lasting operation.

Retrofit your mailbox with ease and open it keylessly via the app from now on.
