24-unit freestanding mailbox system Design BASIC 385P-7016 ST-T - RAL 7016 anthracite grey | RAL 7016 Anthracite grey, fine texture, matt | 300x110x385 mm (WxHxD) - ?? Normal 12 litres | with 24 mailboxes

Product number 385P-7016-24W

Product description

Freestanding mailbox system BASIC 385P for 24 households – RAL 7016 Anthracite grey – wide version

The freestanding BASIC 385P mailbox system for 24 households is designed for large residential complexes, multi-occupancy properties and commercial buildings. 24 separately lockable mailboxes are combined in a wide multi-column arrangement to form a stable, clearly organised complete unit. The freestanding installation allows an easily accessible position independently of the building façade.

The mailboxes are made from galvanised steel and are powder-coated in RAL 7016 Anthracite grey with a fine-structure matt finish. A close-fitting side cladding with rain hood and integrated rain-drip channels support weather protection. The solidly manufactured support posts of anodised aluminium profile are also powder-coated in RAL 7016 Anthracite grey and form a particularly stable, durable base for the freestanding system.

Each of the 24 mailboxes has approx. 12 litres capacity. The 35 × 265 mm mail slot is designed for DIN C4 items in portrait orientation. A noise-dampening rubber lip reduces the impact of the mail flap. Mail is retrieved from the front; the access doors open from left to right. Each mailbox is supplied with two numbered keys and an interchangeable nameplate beneath the mail slot.

The advantages of the BASIC 385P mailbox system at a glance

Solid aluminium support posts

Solidly manufactured, anodised aluminium profiles form the stable base of the freestanding system. The powder-coated construction combines high load capacity with a durable outdoor finish.

DIN C4 mail slot with 12-litre capacity

The mailboxes each offer approx. 12 litres of capacity. The 35 × 265 mm mail slot accepts DIN C4 items in portrait orientation without larger envelopes needing to be unnecessarily folded.

Quiet mail entry and reliable operation

Rubber lips dampen the mail flaps. Robust closures, two keys per compartment and protected interchangeable nameplates are designed for daily use in multi-occupancy properties.

Bolted mounting or concreting-in

Depending on the chosen configuration, the aluminium support posts are either bolted to a load-bearing foundation or permanently concreted in. This allows the system to be installed according to the structural situation.

Robust BASIC quality in RAL 7016 Anthracite grey

Galvanised steel, stainless-steel components, solid aluminium support posts and German manufacture produce a resilient mailbox system for long-term use at the property entrance.

Equipment of the BASIC 385P mailbox system

Mailbox system

Number of mailboxes 24 separately usable mailboxes
Mailbox dimensions 300 × 110 × 385 mm (W × H × D) per compartment
Mail capacity Approx. 12 litres per mailbox
Material Galvanised steel; side cladding and rain hood made of V2A stainless steel
Finish RAL 7016 Anthracite grey fine-structure matt
Mail slot 35 × 265 mm, suitable for DIN C4 portrait
Standard Mailboxes compliant with DIN EN 13724

Mail and operation

Mail flaps With noise-dampening rubber lip
Mail retrieval From the front
Door opening From left to right
Keys 48 keys in total, 2 per mailbox
Nameplates 24 interchangeable nameplates beneath the mail slots
Rain drainage Integrated rain-drip channels

Solid aluminium support posts

Support posts Solidly manufactured, anodised aluminium profile
Coating Powder-coated in RAL 7016 Anthracite grey
Mounting options Choice of bolted mounting or concreting-in
Bolted mounting Support posts selectable in 1200 or 1600 mm
Concreting-in Support posts selectable in 1600 or 2000 mm
Delivery condition Support posts and mailbox system delivered divided for assembly
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Installation on a foundation

Briefkasten Manufaktur Lippe GmbH
Werler Straße 60
32105 Bad Salzuflen

For bolted mounting, a level and sufficiently load-bearing foundation is required. Fasteners must be selected to suit the foundation, the weight of the system and the local installation conditions.

Installation by concreting?in

For the concreting-in version, the extended aluminium support posts are anchored vertically in a suitably dimensioned concrete foundation. Foundation size and embedment depth must be matched to ground conditions, system dimensions and local loads.

Note on weather protection

The rain hood, close-fitting side cladding and rain-drip channels support weather protection. Mail items must be fully inserted so that the mail flaps can close completely. Under extreme weather conditions, slight moisture ingress may occur despite compliant construction.

Product properties

Material	Steel, galvanised, Aluminium AlMg3 W19, Stainless steel V2A 1.4301
Series	BASIC
Boxes by volume	Normal > 10 litres
Name labelling	Nameplate
Mounting type	Free-standing
Surface/colour	RAL 7016 anthracite grey
Removal of mail	On the front
Number of boxes	with 24 letterboxes

Dimensions

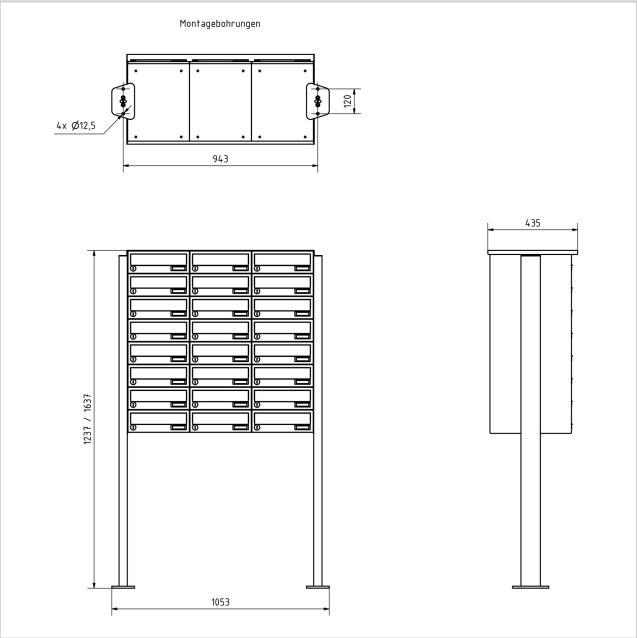

Height in mm	1
Height of single box in mm	110.0
Width of single box in mm	300.0
Capacity in litres	12
Height of letterbox slot in mm	35.0
Width of letter slot in mm	265.0
Height of letterbox in mm	880.0
Width of letterbox system in mm	900.0
Overall height in mm	1200.0 | 1600.0
Total width in mm	980.0
Depth in mm	435.0
Weight in kg	88
Delivery condition	Delivery is in blocks; freestanding units / mailbox delivered in separate parts.
