Stainless steel wall-mounted letterbox system BASIC 623 - Doorbell intercom - 5 parties | Stainless steel, brushed | with 5 mailboxes

Product number 623-VA-5

Product description

BASIC 623 stainless steel through-the-wall letterbox system - bell/intercom station - 5 parties

The stainless steel through-the-wall letterbox has plenty of volume for receiving post and is variable in depth from 290 - 440 mm to optimally adapt to your wall thickness (30 degree angle running diagonally to the rear). Each individual letterbox has a size of 300 x 110 x 290 to 440 mm (WxHxD). The boxes comply with the current EN 13724 standard so that A4 envelopes, for example, can be inserted without being bent and protection against break-ins is guaranteed.

The great advantage of a wall-mounted letterbox system is that it is well protected from the weather and therefore very durable. Also well suited for installation in wall pillars. A quality product made in Germany.

- 5-party wall-mounted letterbox system made of brushed V2A stainless steel
- Removal door without end frame (for an even look without interruptions). Front panel is attached to the plaster.
- Inclined, pull-out box made of galvanised steel, powder-coated in RAL 9007.
- Variable depth from 290mm - 440m, 30 degree angle running diagonally to the rear.
- The letterbox complies with DIN/EN 13724. Insertion size (3.5 cm x 26.5 cm) for C4 high, large letters also fit in here without creasing.
- Insertion flaps with noise-absorbing rubber buffers for very quiet insertion of mail.
- The removal door can be opened from left to right.
- Incl. 2 keys with key number & interchangeable name plate under the flap.
- The lettering on the name plates can be changed as required
- Letterbox system with perforated intercom screen and anti-vandalism bell push-button for each letterbox.
- With universal adapter on the back for installing standard built-in loudspeakers.
- Universal adapter for all commercially available built-in loudspeakers.
- Installation instructions included.
