Product number 863X-STL-PK4-BK4-SF

Product description

4-unit stainless steel parcel locker system BASIC Plus 863X STL with parcel locker 370x550 and letterbox 370x110 - colour of your choice

The BASIC Plus parcel and letter box system from Briefkasten Manufaktur is the well thought-out solution for anyone who wants to enable the secure receipt of mail and parcels at any time of day - independent of the deliverer, weather-protected and maintenance-free. The system was specially developed for use in apartment blocks, residential complexes, company buildings and public facilities and impresses with its clear design, modular functionality and uncompromising material quality. Thanks to the combination of letter and parcel compartments, the BASIC Plus series offers real added value for residents, employees and delivery services. The design is modern, timeless and discreet, so that the system blends effortlessly into any building environment - whether new or existing.

A special feature of the system is the tried-and-tested mechanical parcel lock with T-handle, which makes delivery independent of the delivery person: the delivery person places the parcel in the openly accessible compartment and locks it with a simple click. The compartment remains locked until the authorised user opens it with their key. A clever solution - without electronics, without an app, but with maximum security.

The BASIC Plus collection stands for particularly high product quality "Made in Germany". All components were developed by our own engineers with modularity, ease of repair and self-assembly in mind. Spare parts are permanently available - a decisive advantage for long-lasting use and sustainable investment. Choose the BASIC Plus parcel and letter box system for an elegant, robust solution that is suitable for everyday use and meets the requirements of modern parcel and letter reception in every respect - manufactured with care and precision in the letter box factory in Bad Salzuflen.
