Charging cable spiralised type 2 / open cable end - length 4m - 3 phases - 32A - mode 3 | Typ 2 / offen | Length 4m | spiralised

Product number 609ZB-EC-SP-C2O

Product description

PHOENIX CONTACT Mode 3 charging cable spiralised type 2 / open cable end - length 4m

Safe and fast: With the Phoenix Contact Mode 3 charging cable type 2 / open cable end, you can charge your electric car with up to 22 kilowatts - at your own wallbox or on the road at a public charging station. The type 2 connection has now become established for most electric vehicle models sold in Germany.

The two type designations stand for the plugs/connections of the eCable. The open end of the cable is wired to the charging station or charging box, the other type 2 plug must match the connection of your electric car. The three-phase plug is EU standard and has a maximum charging capacity of 22 kilowatts.

- Full flexibility with 4.0 metres of coiled cable length
- Made in Germany

Technical specifications

- Cable length: 4.0 metres
- Colour: black/grey
- For all electric cars and plug-in hybrids with type 2 plug (European standard: IEC 62196-2).
- Connection infrastructure side: open cable end for installation at charging stations for electric mobility (EVSE)
