6-unit stainless steel freestanding letterbox Design BASIC Plus 385 X ST-R with doorbell box - RAL colour of your choice | Right | ? Colour of your choice | with 6 letterboxes

Product number 385XR-6-SP-R

Product description

Freestanding mailbox system BASIC Plus 385X ST-R with bell/intercom unit for 6 households – panel on the right

The freestanding BASIC Plus 385X ST-R mailbox system for 6 households combines high-quality mail compartments with an integrated bell/intercom unit. This creates a compact entrance solution for apartment buildings, residential complexes as well as office and commercial properties, bringing mailbox, doorbell buttons and provision for a built-in speaker together in a single unit. In this version, the bell/intercom unit is positioned to the right of the mailboxes.

The mailboxes are made from stainless steel V2A and are powder-coated in the selected RAL colour. The weather-resistant support posts are made from brushed stainless steel V2A 1.4301, providing a high-quality contrast and forming the stable freestanding substructure.

Each mailbox offers a volume of approx. 12 litres. The 35 × 265 mm insertion slot is designed for DIN C4 items in portrait orientation. A noise-damping rubber lip on the mail flap, front mail retrieval and robust doors that open from left to right ensure practical day-to-day use.

The advantages of the BASIC Plus 385X ST-R system at a glance

Mailbox and bell in one unit

6 individually usable mail compartments are combined with an integrated bell/intercom unit. This keeps the entrance area functionally and visually compact.

Solid stainless steel support posts

Ø 60 mm support posts made from brushed stainless steel V2A 1.4301 form a stable base for the freestanding mailbox system. The robust construction is designed for long-term use at property entrances.

DIN C4 insertion and 12-litre volume

The mail compartments measuring 300 × 110 × 385 mm (W × H × D) each offer approx. 12 litres of volume. The 35 × 265 mm insertion slot also accepts larger DIN C4 letter items in portrait orientation.

Prepared for built-in speaker

The speaker aperture is equipped with a universal adapter.

BASIC Plus – colour of your choice

The powder-coated V2A mailboxes can be chosen in a RAL colour to suit the architecture. Brushed stainless steel support posts, modular construction and German manufacture complete the durable system.

Equipment of the BASIC Plus 385X ST-R mailbox system

Mailbox system

Number of mailboxes 6 individually lockable mail compartments
Individual mailbox 300 × 110 × 385 mm (W × H × D)
Volume Approx. 12 litres per mailbox

Insertion slot 35 × 265 mm, suitable for DIN C4 portrait
Standard Mailboxes conforming to DIN EN 13724

Bell and intercom unit

Doorbell buttons 6 round stainless steel doorbell buttons Type 4
Bell/intercom unit Stainless steel V2A, powder-coated in RAL colour
Speaker provision Speaker aperture with universal adapter for standard built-in speakers
Panel position Right
Cable access Side cable entry; concealed cable routing through the support post

Support posts and installation

Support posts Ø 60 mm stainless steel V2A 1.4301, brushed
Mounting options Either screw fixing or for in-ground concrete installation
Overall height Depending on the chosen support post configuration
Base material Consistent use of stainless steel V2A
Construction Modular and installation-friendly design
Manufacture Made in Germany by Briefkasten Manufaktur Lippe

Note on the bell/intercom unit

The speaker provision is intended for the installation of a suitable built-in speaker. Planning, electrical connection and commissioning of the intercom system should be carried out by suitably qualified professionals.

Installation of the freestanding system

A level, sufficiently load-bearing foundation is required for screw fixing. For the in-ground concrete version, the support posts must be plumb and permanently anchored in a suitably dimensioned concrete foundation. Fixing and foundation must be matched to the system weight, ground conditions and local circumstances.

Note on weather protection

Post is best protected from moisture and soiling only when items are fully inserted and the mail flap is closed. Protruding letters or magazines can prevent the flaps from closing completely.

BASIC Plus construction and spare parts

The BASIC Plus series is modular and installation-friendly. The consistent use of stainless steel V2A supports long service life; spare parts for BASIC Plus systems are available directly.

Product properties

Surface/colour	RAL 9005 deep black, RAL 3004 crimson red, DB 703 iron mica, RAL 7016 anthracite grey, RAL of your choice (according to colour table), RAL 9007 grey aluminium, RAL 9016 traffic white
Series	BASIC
