Stainless steel letterbox column Designer BIG EDGE V2 - RAL of your choice - DoorBird video intercom system | Right

Product number 608-V2-R-KSDB-R

Product description

Stainless steel letterbox pillar Designer BIG EDGE V2 - RAL of your choice - DoorBird video intercom system

High-quality letterbox column from Briefkasten Manufaktur with door communication on the side. Clear lines, no-frills design and high-quality materials characterise the 3mm stainless steel letterbox pillar from the DESIGNER collection. The letterbox pillar is welded by hand so that no screw connections, hairline joints or gaps are visible in the body area. The inspection door on the back makes it easy to install, as well as to carry out subsequent work, e.g. repairs or regular inspections. Equipped with a high-quality lock, the inspection door is protected against vandalism. Integrated DoorBird IP Video Door Station D2100E or D1100E. The DoorBird IP Video Door Station D2100E or D1100E is the smart solution for your entrance door. The IP video door station can be operated as a stand-alone unit or integrated into an existing smart home platform. Existing, classic installations such as a door chime or an electric door and gate opener can also continue to be used with DoorBird and controlled via the app.

This is a real eye-catcher among letterboxes. Clean lines and no-frills design characterise the designer letterbox. Our products have a high quality, reliable functionality and their own identity. Made by Briefkasten Manufaktur. The DoorBird was not only invented and developed in Germany, but is still produced in Berlin today. At DoorBird, "Made in Germany" is not just a seal, but a philosophy that is lived and breathed. The IP video door stations are manufactured in the DoorBird factory to guarantee the highest quality, durability and customer satisfaction.

- Invisible cable feed through the body is possible.
- The pedestals are fitted with modules that can be replaced at a later date.
- Incl. DoorBird IP video door station D2100E or D1100E installed.

Important information

Camera or intercom preparation

The intercom systems must be connected by an electrician. Please contact your trusted electrician for planning, fitting and installation.

Water protection

To achieve optimum water protection for your mail, the letterbox or letterbox system should be located under a canopy if possible.

The mail is only protected from water if it is fully inserted in the box and the flap is closed. Mail that is not fully inserted allows moisture and dirt to penetrate the letterbox. It is therefore necessary to plan adequately dimensioned letterboxes for the upcoming requirements. In certain extreme weather conditions, water can still enter (according to DIN EN 13724 up to 1ccm). This is not a reason for complaint.
